# ACGME Program Requirements for Graduate Medical Education in Gastroenterology

#### Common Program Requirements (Fellowship) are in BOLD

Where applicable, text in italics describes the underlying philosophy of the requirements in that section. These philosophic statements are not program requirements and are therefore not citable.

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

#### Introduction

**Int.A.** 

Fellowship is advanced graduate medical education beyond a core residency program for physicians who desire to enter more specialized practice. Fellowship-trained physicians serve the public by providing subspecialty care, which may also include core medical care, acting as a community resource for expertise in their field, creating and integrating new knowledge into practice, and educating future generations of physicians. Graduate medical education values the strength that a diverse group of physicians brings to medical care.

Fellows who have completed residency are able to practice independently in their core specialty. The prior medical experience and expertise of fellows distinguish them from physicians entering into residency training. The fellow's care of patients within the subspecialty is undertaken with appropriate faculty supervision and conditional independence. Faculty members serve as role models of excellence, compassion, professionalism, and scholarship. The fellow develops deep medical knowledge, patient care skills, and expertise applicable to their focused area of practice. Fellowship is an intensive program of subspecialty clinical and didactic education that focuses on the multidisciplinary care of patients. Fellowship education is often physically, emotionally, and intellectually demanding, and occurs in a variety of clinical learning environments committed to graduate medical education and the well-being of patients, residents, fellows, faculty members, students, and all members of the health care team.

In addition to clinical education, many fellowship programs advance fellows' skills as physician-scientists. While the ability to create new knowledge within medicine is not exclusive to fellowship-educated physicians, the fellowship experience expands a physician's abilities to pursue hypothesis-driven scientific inquiry that results in contributions to the medical literature and patient care. Beyond the clinical subspecialty expertise achieved, fellows develop mentored relationships built on an infrastructure that promotes collaborative research.

Int.B. Definition of Subspecialty

Gastroenterology is the subspecialty of internal medicine that focuses on the evaluation and treatment of disorders of the gastrointestinal tract.

Gastroenterology requires an extensive understanding of the entire gastrointestinal tract, including the esophagus, stomach, small intestine, liver, gall bladder, pancreas, colon, and rectum.

Some gastroenterology programs may choose to offer fellows intensive clinical experiences in transplant hepatology. Transplant hepatology is the study of the diseases leading to transplantation, the evaluation of patients pre-transplant, the evaluation and treatment of the post-transplant patient, and the management of the complications of transplantation.

# Int.C. Length of Educational Program

The educational program in gastroenterology must be 36 months in length. (Core)\*

#### I. Oversight

#### I.A. Sponsoring Institution

The Sponsoring Institution is the organization or entity that assumes the ultimate financial and academic responsibility for a program of graduate medical education consistent with the ACGME Institutional Requirements.

When the Sponsoring Institution is not a rotation site for the program, the most commonly utilized site of clinical activity for the program is the primary clinical site.

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

I.A.1.

I.B.1.

Sponsoring Institution. (Core)\*

I.B. Participating Sites

A participating site is an organization providing educational experiences or educational assignments/rotations for fellows.

The program must be sponsored by one ACGME-accredited

The program, with approval of its Sponsoring Institution, must designate a primary clinical site. (Core)

89 I.B.1.a) To be eligible for the optional dual gastroenterology/transplant hepatology (GI/TH) pathway, the Sponsoring Institution should also sponsor an ACGME-accredited fellowship in transplant hepatology. (Core)
93

Subspecialty-Specific Background and Intent: While the same Sponsoring Institution typically sponsors both the gastroenterology and transplant hepatology programs, there may be exceptions to this rule. Programs interested in participating in the GI/TH pathway that are not sponsored by the same Sponsoring Institution will need to establish program letters of agreement. See Program Requirement I.B.2. for more information on such agreements. The Committee will consider any exceptions on a case by case basis.

Refer to the "Subspecialty-Specific Background and Intent" box that follows Program Requirement III.A.1.b).(2).b) for a summary of the dual GI/TH pathway.

94		
95 96 97 98 99	I.B.1.b)	The Sponsoring Institution must establish the gastroenterology fellowship within a department of internal medicine or an administrative unit whose primary mission is the advancement of internal medicine subspecialty education and patient care; and, (Detail)
100		
101 102 103 104 105	I.B.1.c)	The Sponsoring Institution must ensure that there is a reporting relationship with the program director of the internal medicine residency program to ensure compliance with ACGME accreditation requirements. (Core)
106 107 108 109 110	I.B.2.	There must be a program letter of agreement (PLA) between the program and each participating site that governs the relationship between the program and the participating site providing a required assignment. (Core)
111 112	I.B.2.a)	The PLA must:
113 114	I.B.2.a).(1)	be renewed at least every 10 years; and, (Core)
115 116 117	I.B.2.a).(2)	be approved by the designated institutional official (DIO). (Core)
118 119 120	I.B.3.	The program must monitor the clinical learning and working environment at all participating sites. (Core)
121 122 123 124	I.B.3.a)	At each participating site there must be one faculty member, designated by the program director, who is accountable for fellow education for that site, in collaboration with the program director. (Core)
40-		• •

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or

125

communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for fellows
- Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern fellow education during the assignment

126 127 128

129

I.B.4. The program director must submit any additions or deletions of participating sites routinely providing an educational experience, required for all fellows, of one month full time equivalent (FTE) or more through the ACGME's Accreditation Data System (ADS). (Core)

130 131 132

133 134

135

I.C.

The program, in partnership with its Sponsoring Institution, must engage in practices that focus on mission-driven, ongoing, systematic recruitment and retention of a diverse and inclusive workforce of residents (if present), fellows, faculty members, senior administrative staff members, and other relevant members of its academic community. (Core)

136 137

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

138 139

I.D. Resources

140 141 142

I.D.1. The program, in partnership with its Sponsoring Institution, must ensure the availability of adequate resources for fellow education.

143 144

145 I.D.1.a) Space and Equipment

146 147

148

There must be space and equipment for the program, including meeting rooms, examination rooms, computers, visual and other educational aids, and work/study space. (Core)

149 150 151

I.D.1.b) Facilities

152

153 I.D.1.b).(1) Inpatient and outpatient systems must be in place to prevent fellows from performing routine clerical functions,

155 156 157		such as scheduling tests and appointments, and retrieving records and letters. (Detail)
157 158 159 160 161 162 163 164 165 166 167	I.D.1.b).(2)	The sponsoring institution must provide the broad range of facilities and clinical support services required to provide comprehensive care of adult patients. (Core)
	I.D.1.b).(3)	Facilities for the intensive care of critically ill patients with gastrointestinal disorders must be provided. These facilities should have a working relationship with diagnostic radiology, general surgery, oncology, pathology services, and pediatrics. (Core)
168 169 170	I.D.1.b).(4)	Fellows must have access to a lounge facility during assigned duty hours. (Detail)
171 172 173 174	I.D.1.b).(5)	When fellows are in the hospital, assigned night duty, or called in from home, they must be provided with a secure space for their belongings. (Detail)
175 176	I.D.1.c)	Laboratory Services
177 178 179 180 181 182 183	I.D.1.c).(1)	There must be a procedure laboratory completely equipped to provide modern capability in gastrointestinal procedures. This equipment must include an up-to-date array of complete diagnostic and therapeutic endoscopic instruments and accessories, with esophageal motility instrumentation. (Core)
184	I.D.1.c).(2)	There should be a laboratory for parasitology testing. (Core)
185 186 187 188 189 190 191	I.D.1.d)	Other Support Services
		Support services, including anesthesiology, diagnostic radiology, general surgery, interventional radiology, medical imaging and nuclear medicine, oncology, and pathology must be available. (Core)
192 193	I.D.1.e)	Medical Records
194 195 196 197 198 199 200 201 202 203 204		Access to an electronic health record should be provided. In the absence of an existing electronic health record, institutions must demonstrate institutional commitment to its development, and progress towards its implementation. (Core)
	I.D.2.	The program, in partnership with its Sponsoring Institution, must ensure healthy and safe learning and working environments that promote fellow well-being and provide for: (Core)
	I.D.2.a)	access to food while on duty; (Core)

205	I.D.2.b)	safe, quiet, clean, and private sleep/rest facilities available
206	-	and accessible for fellows with proximity appropriate for safe
207		patient care; (Core)
208		

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

I.D.2.c) clean and private facilities for lactation that have refrigeration capabilities, with proximity appropriate for safe patient care;

209 210

211

212213

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

044		
214 215 216	I.D.2.d)	security and safety measures appropriate to the participating site; and, <sup>(Core)</sup>
217		one, and,
217 218 219	I.D.2.e)	accommodations for fellows with disabilities consistent with the Sponsoring Institution's policy. (Core)
		the oponsoring institution's policy.
220		
221 222	I.D.3.	Fellows must have ready access to subspecialty-specific and other appropriate reference material in print or electronic format. This
223		must include access to electronic medical literature databases with
224		full text capabilities. (Core)
225		ian toxt supusmitosi
226	I.D.4.	The pregram's advicational and clinical resources must be adequate
	I.D.4.	The program's educational and clinical resources must be adequate
227		to support the number of fellows appointed to the program. <sup>(Core)</sup>
228		
229	I.D.4.a)	Patient Population
230		
231	I.D.4.a).(1)	The patient population must have a variety of clinical
232	, ( )	problems and stages of diseases. (Core)
233		promoting and onego or anothers.
234	I.D.4.a).(2)	There must be patients of each gender, with a broad age
235	1.D.4.a).(2)	range, including geriatric patients. (Core)
		range, including genatile patients.
236	ID ( ) (0)	
237	I.D.4.a).(3)	A sufficient number of patients must be available to enable
238		each fellow to achieve the required educational outcomes.
239		(Core)

240 241 242 243 244 245 246 247	I.D.4.a).(4)	Programs participating in the dual GI/TH pathway must perform 20 liver transplantations per year for each dual GI/TH fellow in addition to the number of liver transplantations required for the separate ACGME-accredited transplant hepatology fellowship program complement. (Detail)
248 249 250 251	I.E.	A fellowship program usually occurs in the context of many learners and other care providers and limited clinical resources. It should be structured to optimize education for all learners present.
252 253 254	I.E.1.	Fellows should contribute to the education of residents in core programs, if present. (Core)

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

#### II. Personnel

255256

257258259260

261

262263264

265

266267268

269 270

II.A.1. There must be one faculty member appointed as program director with authority and accountability for the overall program, including compliance with all applicable program requirements. (Core)

II.A.1.a) The Sponsoring Institution's Graduate Medical Education Committee (GMEC) must approve a change in program director. (Core)

II.A.1.b) Final approval of the program director resides with the Review Committee. (Core)

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and have overall responsibility for the program. The program director's nomination is reviewed and approved by the GMEC. Final approval of the program director resides with the applicable ACGME Review Committee.

271 272 II.A.2. The program director and, as applicable, the program's leadership team, must be provided with support adequate for administration of 273 the program based upon its size and configuration. (Core) 274 275 276 II.A.2.a) At a minimum, the program director must be provided with the 277 salary support required to devote 20-50 percent FTE of non-278 clinical time to the administration of the program. (Core)

283

At a minimum, the program director must be provided with the dedicated time and support specified below for administration of the program: (Core)

Number of Approved	Minimum Support
Fellow Positions	Required (FTE)
<u>&lt;7</u>	<u>.2</u>
<u>7-9</u>	<u>.25</u>
<u>10-12</u>	<u>.3</u>
<u>13-15</u>	<u>.35</u>
<u>16-18</u>	<u>.4</u>
<u>19-21</u>	<u>.45</u>
<u>&gt;21</u>	<u>.5</u>

284 285

II.A.2.b)

286 287 288

289 290 Programs must appoint at least one of the subspecialty-certified core faculty members to be associate program director(s). The associate program directors(s) must be provided with support equal to a dedicated minimum time for administration of the program as follows: (Core)

Number of Approved	Minimum Support
Fellow Positions	Required (FTE)
<u>&lt;7</u>	<u>0</u>
<u>7-9</u>	<u>.13</u>
<u>10-12</u>	<u>.14</u>
<u>13-15</u>	<u>.15</u>
<u>16-18</u>	<u>.16</u>
<u>19-21</u>	<u>.17</u>
<u>22-24</u>	<u>.18</u>
<u>25-27</u>	<u>.24</u>
<u>28-30</u>	<u>.30</u>
<u>31-33</u>	<u>.36</u>
<u>34-36</u>	<u>.42</u>

291

Background and Intent: To achieve successful graduate medical education, individuals serving as education and administrative leaders of fellowship programs, as well as those significantly engaged in the education, supervision, evaluation, and mentoring of fellows, must have sufficient dedicated professional time to perform the vital activities required to sustain an accredited program.

The ultimate outcome of graduate medical education is excellence in fellow education and patient care.

The program director and, as applicable, the program leadership team, devote a portion of their professional effort to the oversight and management of the fellowship program, as defined in II.A.4.-II.A.4.a).(16). Both provision of support for the time required for the leadership effort and flexibility regarding how this support is provided are important. Programs, in partnership with their Sponsoring Institutions, may provide support for this

time in a variety of ways. Examples of support may include, but are not limited to, salary support, supplemental compensation, educational value units, or relief of time from other professional duties.

Program directors and, as applicable, members of the program leadership team, who are new to the role may need to devote additional time to program oversight and management initially as they learn and become proficient in administering the program. It is suggested that during this initial period the support described above be increased as needed.

292

Subspecialty-Specific Background and Intent: For instance, a program with an approved complement of 12 fellows is required to have at least 30 percent FTE support for the Program Director and at least 14 percent FTE support for the associate program director(s). Because an associate program director is also a core faculty member, the minimum dedicated time requirements for associate program directors are inclusive of core faculty activities. An additional 10 percent FTE for the core faculty position is not required. For example, if one core faculty member is named the associate program director for a 12-fellow program, the required minimum support for that position is 14 percent FTE. Further, the Review Committee allows the minimum required FTE support to be shared among multiple associate program directors, as delegated by and at the discretion of the program director.

293	II.A.3.	Qualifications of the program director:
294 295 296 297	II.A.3.a)	must include subspecialty expertise and qualifications acceptable to the Review Committee; and, (Core)
298 299 300 301 302	II.A.3.a).(1)	The program director must have administrative experience and at least three years of participation as an active faculty member in an ACGME-accredited internal medicine residency or gastroenterology fellowship. (Core)
303 304 305 306 307 308 309	II.A.3.b)	must include current certification in the subspecialty for which they are the program director by the American Board of Internal Medicine (ABIM) or by the American Osteopathic Board of Internal Medicine (AOBIM), or subspecialty qualifications that are acceptable to the Review Committee. (Core)
310 311 312	II.A.3.b).(1)	The Review Committee only accepts current ABIM or AOBIM certification in gastroenterology. (Core)
313 314 315 316	II.A.4.	Program Director Responsibilities  The program director must have responsibility, authority, and accountability for: administration and operations; teaching and
317 318 319 320		scholarly activity; fellow recruitment and selection, evaluation, and promotion of fellows, and disciplinary action; supervision of fellows; and fellow education in the context of patient care. (Core)
321 322	II.A.4.a)	The program director must:

be a role model of professionalism; (Core)

II.A.4.a).(1)

323 324

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

325

326 **II.A.4.a).(2)** 327

design and conduct the program in a fashion consistent with the needs of the community, the mission(s) of the Sponsoring Institution, and the mission(s) of the program; (Core)

328 329 330

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

331

332 **II.A.4.a).(3)** 

administer and maintain a learning environment conducive to educating the fellows in each of the ACGME Competency domains; (Core)

members for participation in the fellowship program

333 334 335

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

336

develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the fellowship program education and at least annually thereafter, as outlined in V.B.; (Core)

II.A.4.a).(5) have the authority to approve program faculty

343 344 345

II.A.4.a).(6) have the authority to remove program faculty members from participation in the fellowship program

education at all sites: (Core)

education at all sites; (Core)

347 348 349

350

346

II.A.4.a).(7) have the authority to remove fellows from supervising interactions and/or learning environments that do not

351 352 353

meet the standards of the program; (Core)

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

		<b>G</b>
354		
355	II.A.4.a).(8)	submit accurate and complete information required
356		and requested by the DIO, GMEC, and ACGME; (Core)
357		•
358	II.A.4.a).(9)	provide applicants who are offered an interview with
359		information related to the applicant's eligibility for the
360		relevant subspecialty board examination(s); (Core)
361		
362	II.A.4.a).(10)	provide a learning and working environment in which
363		fellows have the opportunity to raise concerns and
364		provide feedback in a confidential manner as
365		appropriate, without fear of intimidation or retaliation;
366		(Core)
367		
368	II.A.4.a).(11)	ensure the program's compliance with the Sponsoring
369		Institution's policies and procedures related to
370		grievances and due process; (Core)
371		
372	II.A.4.a).(12)	ensure the program's compliance with the Sponsoring
373		Institution's policies and procedures for due process
374		when action is taken to suspend or dismiss, not to
375		promote, or not to renew the appointment of a fellow;
376		(Core)
377		

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

378		
379	II.A.4.a).(13)	ensure the program's compliance with the Sponsoring
380		Institution's policies and procedures on employment
381		and non-discrimination; (Core)
382		•
383	II.A.4.a).(13).(a)	Fellows must not be required to sign a non-
384	, , , , ,	competition guarantee or restrictive covenant.
385		(Core)
386		
387	II.A.4.a).(14)	document verification of program completion for all
388		graduating fellows within 30 days; (Core)
389		<b>gg</b>
390	II.A.4.a).(15)	provide verification of an individual fellow's
391		completion upon the fellow's request, within 30 days;
392		and, (Core)
~~		

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

II.A.4.a).(16)

II.B.

**II.B.2.a)**433

II.B.1.

II.B.2.

obtain review and approval of the Sponsoring Institution's DIO before submitting information or requests to the ACGME, as required in the Institut

requests to the ACGME, as required in the Institutional Requirements and outlined in the ACGME Program Director's Guide to the Common Program

Requirements. (Core)

Faculty

Faculty members are a foundational element of graduate medical education – faculty members teach fellows how to care for patients. Faculty members provide an important bridge allowing fellows to grow and become practice ready, ensuring that patients receive the highest quality of care. They are role models for future generations of physicians by demonstrating compassion, commitment to excellence in teaching and patient care, professionalism, and a dedication to lifelong learning. Faculty members experience the pride and joy of fostering the growth and development of future colleagues. The care they provide is enhanced by the opportunity to teach. By employing a scholarly approach to patient care, faculty members, through the graduate medical education system, improve the health of the individual and the population.

Faculty members ensure that patients receive the level of care expected from a specialist in the field. They recognize and respond to the needs of the patients, fellows, community, and institution. Faculty members provide appropriate levels of supervision to promote patient safety. Faculty members create an effective learning environment by acting in a professional manner and attending to the well-being of the fellows and themselves.

Background and Intent: "Faculty" refers to the entire teaching force responsible for educating fellows. The term "faculty," including "core faculty," does not imply or require an academic appointment.

For each participating site, there must be a sufficient number of faculty members with competence to instruct and supervise all fellows at that location. (Core)

**Faculty members must:** 

be role models of professionalism; (Core)

434	II.B.2.b)	demonstrate commitment to the delivery of safe, quality,
435	-	cost-effective, patient-centered care; (Core)

437

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

<del>1</del> 01		
438	II.B.2.c)	demonstrate a strong interest in the education of fellows; (Core)
439		-
440	II.B.2.d)	devote sufficient time to the educational program to fulfill
441	•	their supervisory and teaching responsibilities; (Core)
442		
443	II.B.2.e)	administer and maintain an educational environment
444	,	conducive to educating fellows; (Core)
445		<b>3</b>
446	II.B.2.f)	regularly participate in organized clinical discussions,
447	<b>,</b>	rounds, journal clubs, and conferences; and, (Core)
448		,
449	II.B.2.g)	pursue faculty development designed to enhance their skills
450	2.12.197	at least annually. (Core)
451		at loadt allilaally!

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

	me renemble program racerd in the aggregater
II.B.3.	Faculty Qualifications
II.B.3.a)	Faculty members must have appropriate qualifications in their field and hold appropriate institutional appointments.
II.B.3.b)	Subspecialty physician faculty members must:
II.B.3.b).(1)	have current certification in the subspecialty by the American Board of Internal Medicine or the American Osteopathic Board of Internal Medicine, or possess qualifications judged acceptable to the Review Committee. (Core)
II.B.3.c)	Any non-physician faculty members who participate in fellowship program education must be approved by the program director. (Core)

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

471

472 473

474 475 476

477 478 479

485 486 II.B.3.d)

II.B.4.

Any other specialty physician faculty members must have current certification in their specialty by the appropriate American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board, or possess qualifications judged acceptable to the Review Committee. (Core)

Core Faculty

Core faculty members must have a significant role in the education and supervision of fellows and must devote a significant portion of their entire effort to fellow education and/or administration, and must, as a component of their activities, teach, evaluate, and provide formative feedback to fellows. (Core)

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum, mentoring fellows, and assessing fellows' progress toward achievement of competence in and the independent practice of the specialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program. Core faculty members may also be selected for their specific expertise and unique contribution to the program. Core faculty members are engaged in a broad range of activities, which may vary across programs and specialties. Core faculty members provide clinical teaching and supervision of fellows, and also participate in non-clinical activities related to fellow education and program administration. Examples of these non-clinical activities include, but are not limited to, interviewing and selecting fellow applicants, providing didactic instruction, mentoring fellows, simulation exercises, completing the annual ACGME Faculty Survey, and participating on the program's Clinical Competency Committee, Program Evaluation Committee, and other GME committees.

487

497

Core faculty members must be designated by the program 488 II.B.4.a) director. (Core) 489 490 491 II.B.4.b) Core faculty members must complete the annual ACGME Faculty Survey. (Core) 492 493 494 II.B.4.c) In addition to the program director, there must be at least three 495 core faculty members certified in gastroenterology by the ABIM or the AOBIM. (Core) 496

498 499 500 501	II.B.4.d)	For programs approved for seven or more fellows, there must be at least one core faculty member certified in gastroenterology by the ABIM or the AOBIM for every 1.5 fellows. (Core)
502 503 504 505	II.B.4.e)	At least one core faculty member certified in gastroenterology by the ABIM or the AOBIM must have demonstrated expertise and a primary focus in hepatology. (Core)
506 507 508 509	II.B.4.f)	At least one core faculty member certified in gastroenterology by the ABIM or the AOBIM must have demonstrated expertise in all aspects of endoscopy, including advanced procedures. (Core)
510 511 512 513 514	II.B.4.g)	One of the subspecialty-certified core faculty members must be appointed as associate program director to assist the program director with the administrative and clinical oversight of the program. (Core)
515 516 517 518 519 520		At a minimum, the required core faculty members, in aggregate and excluding members of the program leadership, must be provided with support equal to an average dedicated minimum of .1 FTE for educational and administrative responsibilities that do not involve direct patient care. (Core)

Subspecialty-Specific Background and Intent: For instance, a program with an approved complement of 12 fellows is required to have a minimum of eight ABIM- or AOBIM-subspecialty-certified faculty members and an FTE of 10 percent each. Because an associate program director is also a core faculty member, the minimum dedicated time requirements for associate program directors are inclusive of core faculty activities. An additional 10 percent FTE for the core faculty position is not required. For example, if one core faculty member is named the associate program director for a 12-fellow program, the required minimum support for that position is 14 percent FTE.

521 522 523

#### II.C. Program Coordinator

524 525 II.C.1. There must be a program coordinator. (Core)

526 527 528

529

II.C.2.

II.C.2.a)

The program coordinator must be provided with support adequate for administration of the program based upon its size and configuration. (Core)

530 531 532

533 534 At a minimum, the program coordinator must be provided with the dedicated time and support specified below for administration of the program. Additional administrative support must be provided based on the program size as follows: (Core)

Number of Approved Fellow Positions	Minimum FTE Required for Coordinator Support	Additional Aggregate FTE Required for Administration of the Program
<u>1-3</u>	<u>.3</u>	<u>0</u>
<u>4-6</u>	<u>.3</u>	<u>.2</u>

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as otherwise titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison and facilitator between the learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a key member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management appropriate to the complexity of the program. Program coordinators are expected to develop in-depth knowledge of the ACGME and Program Requirements, including policies and procedures. Program coordinators assist the program director in meeting accreditation requirements, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

536

Subspecialty-Specific Background and Intent: For instance, a program with an approved complement of 12 fellows is required to have at least 74 percent FTE administrative support: 30 percent FTE for the program coordinator; and an additional 44 percent FTE aggregate support. This additional support may be for the program coordinator only or divided among the program coordinator and one or more other administrative personnel. The Review Committee has not specified how the FTE should be distributed to allow programs, in partnership with their Sponsoring Institution, to allocate the FTE as they see fit.

537 538 539 II.D.

# Other Program Personnel

540 541 The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. (Core)

542

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers,

education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

543 544 545

546

II.D.1. There must be services available from other health care professionals, including dietitians, language interpreters, nurses, occupational

therapists, physical therapists, and social workers. (Detail)

547 548 II.D.2.

There must be appropriate and timely consultation from other specialties. (Detail)

549 550 551

# III. Fellow Appointments

552553554

## III.A. Eligibility Criteria

555 556 557 III.A.1. Eligibility Requirements – Fellowship Programs

All required clinical education for entry into ACGME-accredited fellowship programs must be completed in an ACGME-accredited residency program, an AOA-approved residency program, a program with ACGME International (ACGME-I) Advanced Specialty Accreditation, or a Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of Canada (CFPC)-accredited residency program located in Canada.

562 563 564

565

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

566 567

III.A.1.a)

III.A.1.b).(1)

III.A.1.b).(2)

568 569 570

571 572 III.A.1.b)

574 575 576

573

577578579

580 581 582

583 584 585

586 III.A.1.b).(2).(a) 587

Fellowship programs must receive verification of each entering fellow's level of competence in the required field,

upon matriculation, using ACGME, ACGME-I, or CanMEDS
Milestones evaluations from the core residency program. (Core)

Prior to appointment in the fellowship, fellows should have completed an internal medicine program that satisfies the requirements in III.A.1. (Core)

Fellows who did not complete an internal medicine program that satisfies the requirements in III.A.1. must have completed at least three years of internal medicine education prior to starting the fellowship as well as met all of the criteria in the "Fellow Eligibility Exception" section

below. (Core)

To be eligible for appointment to the dual GI/TH pathway in the second or third year of education, fellows must be:

on a trajectory to achieving competence in gastroenterology by the end of the 36-month

588 589		educational program based on progress along the subspecialty-specific Milestones; and, (Core)
590		
591	III.A.1.b).(2).(b)	approved by the gastroenterology Clinical
592		Competency Committee, the gastroenterology
593		program director, and the transplant hepatology
594		program director. (Core)
595		

Subspecialty-Specific Background and Intent: The dual GI/TH pathway is an intensive clinical education pathway that requires accelerated progression along gastroenterology subspecialty-specific Milestones in order to successfully achieve competence in both gastroenterology and transplant hepatology within the 36-month educational program. A fellow's trajectory and suitability for this pathway will need to be assessed during the first year; therefore, it may not be appropriate to designate a fellow for this pathway before starting fellowship education and training. Education and training in transplant hepatology in the dual GI/TH pathway cannot begin until the second year. In some cases, a fellow may not be ready to enter the dual GI/TH pathway until the third year.

596 597	III.A.1.c)	Fellow Eligibility Exception
598	III.A. 1.0)	renow Enginity Exception
599 600 601		The Review Committee for Internal Medicine will allow the following exception to the fellowship eligibility requirements:
602 603 604 605 606 607 608	III.A.1.c).(1)	An ACGME-accredited fellowship program may accept an exceptionally qualified international graduate applicant who does not satisfy the eligibility requirements listed in III.A.1., but who does meet all of the following additional qualifications and conditions: (Core)
609 610 611 612 613 614 615	III.A.1.c).(1).(a)	evaluation by the program director and fellowship selection committee of the applicant's suitability to enter the program, based on prior training and review of the summative evaluations of training in the core specialty; and, (Core)
616 617 618 619	III.A.1.c).(1).(b)	review and approval of the applicant's exceptional qualifications by the GMEC; and, (Core)
620 621 622 623	III.A.1.c).(1).(c)	verification of Educational Commission for Foreign Medical Graduates (ECFMG) certification. (Core)
624 625 626 627 628	III.A.1.c).(2)	Applicants accepted through this exception must have an evaluation of their performance by the Clinical Competency Committee within 12 weeks of matriculation. (Core)

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

III.B. The program director must not appoint more fellows than approved by the Review Committee. (Core)

III.B.1. All complement increases must be approved by the Review Committee. (Core)

III.B.2. The number of available fellow positions in the program must be at least one per year. (Detail)

III.C. Fellow Transfers

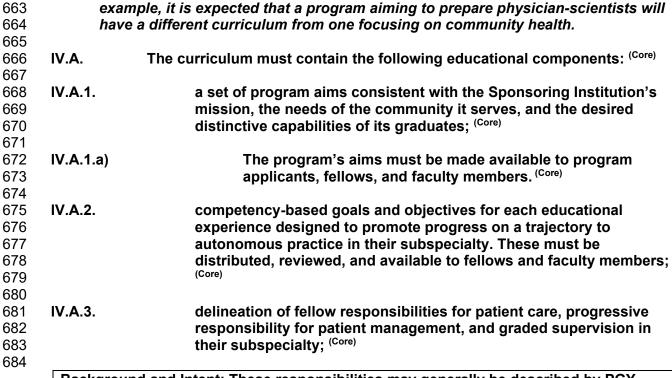

The program must obtain verification of previous educational experiences and a summative competency-based performance evaluation prior to acceptance of a transferring fellow, and Milestones evaluations upon matriculation. (Core)

### IV. Educational Program

The ACGME accreditation system is designed to encourage excellence and innovation in graduate medical education regardless of the organizational affiliation, size, or location of the program.

The educational program must support the development of knowledgeable, skillful physicians who provide compassionate care.

In addition, the program is expected to define its specific program aims consistent with the overall mission of its Sponsoring Institution, the needs of the community it serves and that its graduates will serve, and the distinctive capabilities of physicians it intends to graduate. While programs must demonstrate substantial compliance with the Common and subspecialty-specific Program Requirements, it is recognized that within this framework, programs may place different emphasis on research, leadership, public health, etc. It is expected that the program aims will reflect the nuanced program-specific goals for it and its graduates; for

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

IV.A.4. structured educational activities beyond direct patient care; and,

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

IV.A.5. advancement of fellows' knowledge of ethical principles foundational to medical professionalism. (Core)

## IV.B. ACGME Competencies

685 686

687 688

689 690

691 692 693

694

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus

in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

695 696 The program must integrate the following ACGME Competencies IV.B.1. into the curriculum: (Core) 697 698 699 IV.B.1.a) **Professionalism** 700 701 Fellows must demonstrate a commitment to professionalism and an adherence to ethical principles. (Core) 702 703 704 **Patient Care and Procedural Skills** IV.B.1.b) 705

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s Crossing the Quality Chasm: A New Health System for the 21st Century, 2001 and Berwick D, Nolan T, Whittington J. The Triple Aim: care, cost, and quality. Health Affairs. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

707 708 709 710 711	IV.B.1.b).(1)	Fellows must be able to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health. (Core)
711 712 713 714 715 716 717	IV.B.1.b).(1).(a)	Fellows must demonstrate competence in the practice of health promotion, disease prevention, diagnosis, care, and treatment of patients of each gender, from adolescence to old age, during health and all stages of illness; and, (Core)
718 719 720 721	IV.B.1.b).(1).(b)	Fellows must demonstrate competence in prevention, evaluation, and management of the following:
722 723 724	IV.B.1.b).(1).(b).(i)	acid peptic disorders of the gastrointestinal tract; (Core)
725 726 727	IV.B.1.b).(1).(b).(ii)	acute and chronic gallbladder and biliary tract diseases; (Core)
728 729	IV.B.1.b).(1).(b).(iii)	acute and chronic liver diseases; (Core)

	IV.B.1.c).(4).(e)	the organizational and logistic aspects of liver transplantation, including the role of nurse coordinators and other support staff members (including social work), organ procurement, and United Network for Organ Sharing policies, to include those regarding organ allocation; (Core)
	IV.B.1.c).(4).(f)	principles and application of artificial liver support;
934 935 936	IV.B.1.c).(4).(g)	principles of donor selection and rejection (e.g., hemodynamic management, donor organ steatosis, and indication for liver biopsy); (Core)

937 938 939 940 941	IV.B.1.c).(4).(h)	principles of living donor selection, including appropriate surgical, psychosocial and ethical considerations; (Core)
942 943 944	IV.B.1.c).(4).(i)	principles and practice of pediatric liver transplantation; (Core)
945 946 947 948 949	IV.B.1.c).(4).(j)	transplant immunology, including blood group matching, histocompatibility, tissue typing, and infectious and malignant complications of immunosuppression; and, (Core)
950 951 952 953 954	IV.B.1.c).(4).(k)	indications, contraindications, limitations, complications, alternatives, and techniques of native and allograft biopsies and non-invasive methods of fibrosis assessment. (Core)
955	IV.B.1.d)	Practice-based Learning and Improvement
956 957 958 959 960 961		Fellows must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. (Core)

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

		the state of the s
962		
963	IV.B.1.e)	Interpersonal and Communication Skills
964		
965		Fellows must demonstrate interpersonal and communication
966		skills that result in the effective exchange of information and
967		collaboration with patients, their families, and health
968		professionals. <sup>(Core)</sup>
969		
970	IV.B.1.f)	Systems-based Practice
971		
972		Fellows must demonstrate an awareness of and
973		responsiveness to the larger context and system of health
974		care, including the social determinants of health, as well as
975		the ability to call effectively on other resources to provide
976		optimal health care. (Core)
977		·
978	IV.C.	Curriculum Organization and Fellow Experiences
979		·

980 981 982 983	IV.C.1.	The curriculum must be structured to optimize fellow educational experiences, the length of these experiences, and supervisory continuity. (Core)
984 985 986 987 988 989	IV.C.1.a)	Assignment of rotations must be structured to minimize the frequency of rotational transitions, and rotations must be of sufficient length to provide a quality educational experience, defined by continuity of patient care, ongoing supervision, longitudinal relationships with faculty members, and meaningful assessment and feedback. (Core)
990 991 992 993 994 995	IV.C.1.b)	Clinical experiences should be structured to facilitate learning in a manner that allows fellows to function as part of an effective interprofessional team that works together towards the shared goals of patient safety and quality improvement. (Core)
996 997 998 999	IV.C.2.	The program must provide instruction and experience in pain management if applicable for the subspecialty, including recognition of the signs of addiction. (Core)
1000 1001 1002	IV.C.3.	A minimum of 18 months must be devoted to clinical experience, of which the equivalent of five months should be composed of hepatology. (Core)
1003 1004	IV.C.3.a)	Dual GI/TH pathway:
1005 1006 1007 1008 1009	IV.C.3.a).(1)	In addition to the minimum of 18 months devoted to clinical experience in gastroenterology, a minimum of 12 months must be devoted to clinical experience in transplant hepatology. (Core)
1010 1011 1012 1013	IV.C.3.a).(2)	All 12 months of transplant hepatology must include clinical experiences and appropriate protected (block or concurrent) time for research. (Core)
1014 1015 1016 1017	IV.C.3.a).(3)	Fellows must not begin education and training in transplant hepatology in the dual GI/TH pathway until the second year of the educational program. (Core)

Subspecialty-Specific Background and Intent: The dual GI/TH pathway is an intensive clinical education pathway that is appropriate for fellows seeking a career in clinical advanced and transplant hepatology. This intensive clinical fellowship may not be appropriate for fellows who prefer to focus on other career interests prior to transplant hepatology education and training, including research or an additional advanced degree. Programs are expected to identify fellows in the first year who may be interested in the dual GI/TH pathway. Faculty and clinical resources will need to be available to support the education of dual GI/TH pathway fellows in addition to fellows in the transplant hepatology fellowship. The curriculum, experiences, and evaluation of fellows in the dual GI/TH pathway should occur in collaboration with the transplant hepatology program director, faculty members, and Clinical Competency Committee. As such, the education of fellows in the dual GI/TH pathway requires close cooperation between the gastroenterology and transplant hepatology program directors. The 12 months of transplant hepatology clinical

experience do not need to be consecutive. Programs are expected to notify the ACGME, via ADS, of a fellow's participation in the dual GI/TH pathway at the beginning of the second and/or third year of the educational program.

1202	IV.C.10.	Follows must receive instruction in practice management relevant to
1203	17.0.10.	Fellows must receive instruction in practice management relevant to gastroenterology. (Detail)
1204		gastroenterology.
1206	IV.C.10.a)	Fellows in the dual GI/TH pathway must be instructed in practice
1207	17.0.10.4)	management relevant to transplant hepatology in addition to
1208		gastroenterology. (Detail)
1209		guencemensing
1210	IV.D.	Scholarship
1211		-
1212		Medicine is both an art and a science. The physician is a humanistic
1213		scientist who cares for patients. This requires the ability to think critically,
1214		evaluate the literature, appropriately assimilate new knowledge, and
1215		practice lifelong learning. The program and faculty must create an
1216		environment that fosters the acquisition of such skills through fellow
1217		participation in scholarly activities as defined in the subspecialty-specific

1218 1219		Program Requirements. Scholarly activities may include discovery, integration, application, and teaching.
1220 1221 1222 1223 1224 1225 1226 1227 1228 1229		The ACGME recognizes the diversity of fellowships and anticipates that programs prepare physicians for a variety of roles, including clinicians, scientists, and educators. It is expected that the program's scholarship will reflect its mission(s) and aims, and the needs of the community it serves. For example, some programs may concentrate their scholarly activity on quality improvement, population health, and/or teaching, while other programs might choose to utilize more classic forms of biomedical research as the focus for scholarship.
1230 1231	IV.D.1.	Program Responsibilities
1232 1233 1234	IV.D.1.a)	The program must demonstrate evidence of scholarly activities, consistent with its mission(s) and aims. (Core)
1235 1236 1237 1238	IV.D.1.b)	The program in partnership with its Sponsoring Institution, must allocate adequate resources to facilitate fellow and faculty involvement in scholarly activities. (Core)
1239 1240	IV.D.2.	Faculty Scholarly Activity
1241 1242 1243	IV.D.2.a)	Among their scholarly activity, programs must demonstrate accomplishments in at least three of the following domains:
1244 1245 1246 1247		<ul> <li>Research in basic science, education, translational science, patient care, or population health</li> <li>Peer-reviewed grants</li> </ul>
1247 1248 1249 1250 1251 1252 1253		<ul> <li>Quality improvement and/or patient safety initiatives</li> <li>Systematic reviews, meta-analyses, review articles, chapters in medical textbooks, or case reports</li> <li>Creation of curricula, evaluation tools, didactic educational activities, or electronic educational materials</li> </ul>
1254 1255 1256		<ul> <li>Contribution to professional committees, educational organizations, or editorial boards</li> <li>Innovations in education</li> </ul>
1257 1258 1259 1260 1261	IV.D.2.b)	The program must demonstrate dissemination of scholarly activity within and external to the program by the following methods:
1201		

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program's effectiveness in the creation of an environment of inquiry that advances the fellows' scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the

creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

IV.D.3.

IV.D.3.a)

At least 50 percent of the core faculty members who are certified in the subspecialty by the ABIM or AOBIM (see II.B.4.c)-d)) must annually engage in a variety of scholarly activities, as listed in Program Requirement IV.D.2.b).(1). (Core)

**Fellow Scholarly Activity** 

While in the program, at least 50 percent of the program's fellows must have engaged in more than one of the following scholarly

activities: participation in grand rounds, posters, workshops, quality improvement presentations, podium presentations, grant leadership, non-peer-reviewed print/electronic resources, articles or publications, book chapters, textbooks, webinars, service on professional committees, or serving as a journal reviewer, journal editorial board member, or editor. (Outcome)

V. **Evaluation** 

V.A. **Fellow Evaluation** 

V.A.1. Feedback and Evaluation

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and selfreflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is monitoring fellow learning and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- fellows identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is evaluating a fellow's learning by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

100E

1295		
1296 1297	V.A.1.a)	Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during
1298		each rotation or similar educational assignment. (Core)
1299 1300 1301	V.A.1.a).(1)	The faculty must discuss this evaluation with each fellow at the completion of each assignment. (Core)
1302 1303 1304 1305	V.A.1.a).(2)	Assessment of procedural competence should include a formal evaluation process and not be based solely on a minimum number of procedures performed. (Detail)
1306 1307 1308	V.A.1.a).(3)	Dual GI/TH pathway:
1309 1310 1311 1312 1313	V.A.1.a).(3).(a)	Evaluation of performance must include evaluation of competence in transplant hepatology in addition to gastroenterology, including progress along the subspecialty-specific Milestones for each specialty independently. (Core)
1314 1315 1316 1317 1318 1319 1320	V.A.1.a).(3).(b)	The gastroenterology program director must obtain input from the transplant hepatology program director and transplant hepatology Clinical Competency Committee to assist with evaluation of fellows. (Core)
1321 1322 1323 1324	V.A.1.a).(3).(c)	The summative evaluation must include each fellow's readiness to participate or continue in the dual GI/TH pathway, if applicable. (Core)
1325 1326 1327 1328 1329	V.A.1.a).(3).(d)	The gastroenterology program director must obtain input from the transplant hepatology program director to provide a final evaluation for each fellow upon completion of the program. (Core)
1330 1331	V.A.1.a).(3).(e)	The final evaluation of fellows must:

1332 1333 1334 1335 1336	V.A.1.a).(3).(e).(i)	verify that the fellow has demonstrated the knowledge, skills, and behaviors necessary to enter autonomous practice in transplant hepatology and gastroenterology; and, (Core)
1337	V.A.1.a).(3).(e).(ii)	consider recommendations from both
1338		transplant hepatology and gastroenterology
1339		Clinical Competency Committees. (Core)
1340		
1341	V.A.1.a).(3).(f)	The Clinical Competency Committee must obtain
1342		input from the transplant hepatology program
1343		director and transplant hepatology Clinical
1344		Competency Committee to determine each fellow's
1345		progress on achievement of the subspecialty-
1346		specific Milestones in transplant hepatology and to
1347		advise the program director regarding each fellow's
1348		progress. (Core)
1349		
1350	V.A.1.a).(3).(g)	The fellows should evaluate transplant hepatology
1351		faculty members as relates to the transplant
1352		hepatology educational program. (Detail)
1353		

Subspecialty-Specific Background and Intent: Due to the unique nature of education and training in two specialties, the evaluation of fellows in the dual GI/TH pathway should occur in collaboration with the transplant hepatology fellowship program director, faculty members, and Clinical Competency Committee. The gastroenterology program director and Clinical Competency Committee will obtain input from the transplant hepatology program director and Clinical Competency Committee to determine the progress of each dual GI/TH fellow in transplant hepatology based on achievement of the subspecialty-specific Milestones. This should include broad input from multiple evaluators, including transplant nurses, transplant social workers, and transplant surgeons. This assessment should be in addition to the assessment of progress toward the unsupervised practice of gastroenterology. The annual summative evaluation should determine if a fellow is ready to participate or continue in the dual GI/TH pathway. The dual GI/TH fellow also should have the opportunity to evaluate transplant hepatology faculty members in addition to gastroenterology faculty members.

1354

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

1355 1356

1357 1358 1359

1360

1361 1362 V.A.1.b)

Evaluation must be documented at the completion of the assignment. (Core)

V.A.1.b).(1)

For block rotations of greater than three months in duration, evaluation must be documented at least every three months. (Core)

1.b).(2)	Longitudinal experiences such as continuity clinic in the context of other clinical responsibilities must be
	evaluated at least every three months and at
	completion. <sup>(Core)</sup>
1.c)	The program must provide an objective performance
	evaluation based on the Competencies and the subspecialty-
•	specific Milestones, and must: (Core)
.1.c).(1)	use multiple evaluators (e.g., faculty members, peers,
	patients, self, and other professional staff members);
	and, <sup>(Core)</sup>
.1.c).(2)	provide that information to the Clinical Competency
	Committee for its synthesis of progressive fellow
	performance and improvement toward unsupervised
	practice. (Core)
	-
	1.c) 1.c).(1)

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

1001		
1382	V.A.1.d)	The program director or their designee, with input from the
1383		Clinical Competency Committee, must:
1384		
1385	V.A.1.d).(1)	meet with and review with each fellow their
1386	, , ,	documented semi-annual evaluation of performance,
1387		including progress along the subspecialty-specific
1388		Milestones. (Core)
1389		
1390	V.A.1.d).(2)	assist fellows in developing individualized learning
1391	, , ,	plans to capitalize on their strengths and identify areas
1392		for growth; and, <sup>(Core)</sup>
1393		3 , ,
1394	V.A.1.d).(3)	develop plans for fellows failing to progress, following
1395		institutional policies and procedures. (Core)
1396		
1000		

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in

knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

V.A.1.e)	At least annually, there must be a summative evaluation of
,	each fellow that includes their readiness to progress to the
	next year of the program, if applicable. (Core)

1445	V.A.3.b).(1)		review all fellow evaluations at least semi-annually;
1446			(Core)
1447			
1448	V.A.3.b).(2)		determine each fellow's progress on achievement of
1449			the subspecialty-specific Milestones; and, (Core)
1450			
1451	V.A.3.b).(3)		meet prior to the fellows' semi-annual evaluations and
1452			advise the program director regarding each fellow's
1453			progress. (Core)
1454			
1455	V.B.	Faculty Evaluation	
1456			
1457	V.B.1.		must have a process to evaluate each faculty
1458			rformance as it relates to the educational program at
1459		least annually	y. <sup>(Core)</sup>

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

1461 1462

1463

1464 1465

1466 1467

1460

V.B.1.a) This evaluation must include a review of the faculty member's clinical teaching abilities, engagement with the educational program, participation in faculty development related to their skills as an educator, clinical performance, professionalism, and scholarly activities. (Core)

1468 1469	V.B.1.b)	This evaluation must include written, confidential evaluations by the fellows. (Core)
1470		by the follows.
1471	V.B.2.	Faculty members must receive feedback on their evaluations at least
1472		annually. <sup>(Core)</sup>
1473		
1474	V.B.3.	Results of the faculty educational evaluations should be
1475		incorporated into program-wide faculty development plans. (Core)
1476		

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

1477		
1478	V.C.	Program Evaluation and Improvement
1479		
1480	V.C.1.	The program director must appoint the Program Evaluation
1481		Committee to conduct and document the Annual Program
1482		Evaluation as part of the program's continuous improvement
1483		process. (Core)
1484		·
1485	V.C.1.a)	The Program Evaluation Committee must be composed of at
1486	ŕ	least two program faculty members, at least one of whom is a
1487		core faculty member, and at least one fellow. (Core)
1488		
1489	V.C.1.b)	Program Evaluation Committee responsibilities must include:
1490	•	·
1491	V.C.1.b).(1)	acting as an advisor to the program director, through
1492	, , ,	program oversight; (Core)
1493		
1494	V.C.1.b).(2)	review of the program's self-determined goals and
1495	, , ,	progress toward meeting them; (Core)
1496		
1497	V.C.1.b).(3)	guiding ongoing program improvement, including
1498	, , ,	development of new goals, based upon outcomes;
1499		and, <sup>(Core)</sup>
1500		
1501	V.C.1.b).(4)	review of the current operating environment to identify
1502		strengths, challenges, opportunities, and threats as
1503		related to the program's mission and aims. (Core)
1504		

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.

1505

1/177

1506 1507 1508	V.C.1.c)	The Program Evaluation Committee should consider the following elements in its assessment of the program:
1508 1509 1510	V.C.1.c).(1)	curriculum; (Core)
1511 1512 1513	V.C.1.c).(2)	outcomes from prior Annual Program Evaluation(s); (Core)
1514 1515 1516	V.C.1.c).(3)	ACGME letters of notification, including citations, Areas for Improvement, and comments; (Core)
1517 1518	V.C.1.c).(4)	quality and safety of patient care; (Core)
1519 1520	V.C.1.c).(5)	aggregate fellow and faculty:
1521 1522	V.C.1.c).(5).(a)	well-being; (Core)
1523 1524	V.C.1.c).(5).(b)	recruitment and retention; (Core)
1525 1526	V.C.1.c).(5).(c)	workforce diversity; (Core)
1527 1528 1529	V.C.1.c).(5).(d)	engagement in quality improvement and patient safety; (Core)
1530 1531	V.C.1.c).(5).(e)	scholarly activity; (Core)
1532 1533 1534	V.C.1.c).(5).(f)	ACGME Resident/Fellow and Faculty Surveys (where applicable); and, (Core)
1535 1536	V.C.1.c).(5).(g)	written evaluations of the program. (Core)
1537 1538	V.C.1.c).(6)	aggregate fellow:
1539 1540	V.C.1.c).(6).(a)	achievement of the Milestones; (Core)
1541 1542 1543	V.C.1.c).(6).(b)	in-training examinations (where applicable);
1544 1545	V.C.1.c).(6).(c)	board pass and certification rates; and, (Core)
1546 1547	V.C.1.c).(6).(d)	graduate performance. (Core)
1548 1549	V.C.1.c).(7)	aggregate faculty:
1550 1551	V.C.1.c).(7).(a)	evaluation; and, (Core)
1552 1553	V.C.1.c).(7).(b)	professional development (Core)
1554 1555 1556	V.C.1.d)	The Program Evaluation Committee must evaluate the program's mission and aims, strengths, areas for improvement, and threats. (Core)

1557		
1558	V.C.1.e)	The annual review, including the action plan, must:
1559		
1560	V.C.1.e).(1)	be distributed to and discussed with the members of
1561		the teaching faculty and the fellows; and, (Core)
1562		
1563	V.C.1.e).(2)	be submitted to the DIO. (Core)
1564		
1565	V.C.2.	The program must participate in a Self-Study prior to its 10-Year
1566		Accreditation Site Visit. (Core)
1567		
1568	V.C.2.a)	A summary of the Self-Study must be submitted to the DIO.
1569		(Core)

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the ACGME Manual of Policies and Procedures. Additionally, a description of the Self-Study process, as well as information on how to prepare for the 10-Year Accreditation Site Visit, is available on the ACGME website.

1571		
1572	V.C.3.	One goal of ACGME-accredited education is to educate physicians
1573		who seek and achieve board certification. One measure of the
1574		effectiveness of the educational program is the ultimate pass rate.
1575		
1576		The program director should encourage all eligible program
1577		graduates to take the certifying examination offered by the
1578		applicable American Board of Medical Specialties (ABMS) member
1579		board or American Osteopathic Association (AOA) certifying board.
1580		
1581	V.C.3.a)	For subspecialties in which the ABMS member board and/or
1582	,	AOA certifying board offer(s) an annual written exam, in the
1583		preceding three years, the program's aggregate pass rate of
1584		those taking the examination for the first time must be higher
1585		than the bottom fifth percentile of programs in that
1586		subspecialty. (Outcome)
1587		•
1588	V.C.3.b)	For subspecialties in which the ABMS member board and/or
1589	,	AOA certifying board offer(s) a biennial written exam, in the
1590		preceding six years, the program's aggregate pass rate of
1591		those taking the examination for the first time must be higher
1592		than the bottom fifth percentile of programs in that
1593		subspecialty. (Outcome)
1594		
1595	V.C.3.c)	For subspecialties in which the ABMS member board and/or
1596	,	AOA certifying board offer(s) an annual oral exam, in the
		z i z z z z i i j i i g z z z i z i i i z z z z z z z z z

1597 1598 1599 1600 1601		preceding three years, the program's aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. (Outcome)
1602	V.C.3.d)	For subspecialties in which the ABMS member board and/or
1603		AOA certifying board offer(s) a biennial oral exam, in the
1604		preceding six years, the program's aggregate pass rate of
1605		those taking the examination for the first time must be higher
1606		than the bottom fifth percentile of programs in that
1607		subspecialty. (Outcome)
1608		
1609	V.C.3.e)	For each of the exams referenced in V.C.3.a)-d), any program
1610		whose graduates over the time period specified in the
1611		requirement have achieved an 80 percent pass rate will have
1612		met this requirement, no matter the percentile rank of the
1613		program for pass rate in that subspecialty. (Outcome)
1614		

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

1615 1616

V.C.3.f)

1617 1618 1619 Programs must report, in ADS, board certification status annually for the cohort of board-eligible fellows that graduated seven years earlier. (Core)

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

1620 1621

## VI. The Learning and Working Environment

1623
1624
1625
1626
1627
1628
1629
1630
1631
1632
1633
1634
1635
1636
1637
1638
1639
1640

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

- Excellence in the safety and quality of care rendered to patients by fellows today
- Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice
- Excellence in professionalism through faculty modeling of:
  - the effacement of self-interest in a humanistic environment that supports the professional development of physicians
  - o the joy of curiosity, problem-solving, intellectual rigor, and discovery
- Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

1642 1643

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

1644 1645

VI.A.1. Patient Safety and Quality Improvement

1646 1647

1648 1649 All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with

1650 1651 1652 1653 1654 1655 1656		continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.
1657 1658 1659 1660 1661 1662		Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating fellows will apply these skills to critique their future unsupervised practice and effect quality improvement measures.
1663 1664 1665 1666		It is necessary for fellows and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.
1667 1668	VI.A.1.a)	Patient Safety
1669 1670	VI.A.1.a).(1)	Culture of Safety
1671 1672 1673 1674 1675 1676 1677		A culture of safety requires continuous identification of vulnerabilities and a willingness to transparently deal with them. An effective organization has formal mechanisms to assess the knowledge, skills, and attitudes of its personnel toward safety in order to identify areas for improvement.
1678 1679 1680 1681 1682	VI.A.1.a).(1).(a)	The program, its faculty, residents, and fellows must actively participate in patient safety systems and contribute to a culture of safety.
1683 1684 1685 1686	VI.A.1.a).(1).(b)	The program must have a structure that promotes safe, interprofessional, team-based care. (Core)
1687 1688	VI.A.1.a).(2)	Education on Patient Safety
1689 1690 1691 1692		Programs must provide formal educational activities that promote patient safety-related goals, tools, and techniques. (Core)
	_	ntent: Optimal patient safety occurs in the setting of a coordinated learning and working environment.
1693 1694 1695	VI.A.1.a).(3)	Patient Safety Events
1695 1696 1697 1698		Reporting, investigation, and follow-up of adverse events, near misses, and unsafe conditions are pivotal mechanisms for improving patient safety, and are

1699 1700 1701 1702 1703 1704 1705		essential for the success of any patient safety program. Feedback and experiential learning are essential to developing true competence in the ability to identify causes and institute sustainable systemsbased changes to ameliorate patient safety vulnerabilities.
1705 1706 1707 1708	VI.A.1.a).(3).(a)	Residents, fellows, faculty members, and other clinical staff members must:
1709 1710 1711 1712	VI.A.1.a).(3).(a).(i)	know their responsibilities in reporting patient safety events at the clinical site; (Core)
1712 1713 1714 1715 1716	VI.A.1.a).(3).(a).(ii)	know how to report patient safety events, including near misses, at the clinical site; and, (Core)
1710 1717 1718 1719 1720	VI.A.1.a).(3).(a).(iii)	be provided with summary information of their institution's patient safety reports. (Core)
1721 1722 1723 1724 1725 1726	VI.A.1.a).(3).(b)	Fellows must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions. (Core)
1727 1728 1729 1730	VI.A.1.a).(4)	Fellow Education and Experience in Disclosure of Adverse Events
1731 1732 1733 1734 1735 1736		Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for fellows to develop and apply.
1737 1738 1739 1740	VI.A.1.a).(4).(a)	All fellows must receive training in how to disclose adverse events to patients and families. (Core)
1740 1741 1742 1743 1744	VI.A.1.a).(4).(b)	Fellows should have the opportunity to participate in the disclosure of patient safety events, real or simulated. (Detail)†
1745	VI.A.1.b)	Quality Improvement
1746 1747 1748	VI.A.1.b).(1)	Education in Quality Improvement

1749		A cohesive model of health care includes quality-
1750		related goals, tools, and techniques that are necessary
1751		in order for health care professionals to achieve
1752		•
		quality improvement goals.
1753		
1754	VI.A.1.b).(1).(a)	Fellows must receive training and experience in
1755		quality improvement processes, including an
1756		understanding of health care disparities. (Core)

1773		reducing health care dispartites.
	\/I A O	Companie in and Approximately life.
1781	VI.A.2.	Supervision and Accountability
1782		
1783	VI.A.2.a)	Although the attending physician is ultimately responsible for
1784		the care of the patient, every physician shares in the
1785		responsibility and accountability for their efforts in the
1786		provision of care. Effective programs, in partnership with
1787		their Sponsoring Institutions, define, widely communicate,
1788		and monitor a structured chain of responsibility and
1789		accountability as it relates to the supervision of all patient
1790		care.
1791		
1792		Supervision in the setting of graduate medical education
1793		provides safe and effective care to patients; ensures each
1794		fellow's development of the skills, knowledge, and attitudes
1795		required to enter the unsupervised practice of medicine; and
1796		establishes a foundation for continued professional growth.
1797		
1798	VI.A.2.a).(1)	Each patient must have an identifiable and
1799	, , ,	appropriately-credentialed and privileged attending
		arka akanana ana kamasa ananana

1800 1801 1802 1803		physician (or licensed independent practitioner as specified by the applicable Review Committee) who is responsible and accountable for the patient's care.
1804 1805 1806 1807 1808	VI.A.2.a).(1).(a)	This information must be available to fellows, faculty members, other members of the health care team, and patients. (Core)
1809 1810 1811 1812	VI.A.2.a).(1).(b)	Fellows and faculty members must inform each patient of their respective roles in that patient's care when providing direct patient care. (Core)
1813 1814 1815 1816 1817 1818 1819 1820 1821 1822 1823	VI.A.2.b)	Supervision may be exercised through a variety of methods. For many aspects of patient care, the supervising physician may be a more advanced fellow. Other portions of care provided by the fellow can be adequately supervised by the appropriate availability of the supervising faculty member or fellow, either on site or by means of telecommunication technology. Some activities require the physical presence of the supervising faculty member. In some circumstances, supervision may include post-hoc review of fellow-delivered care with feedback.

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

1824		
1825	VI.A.2.b).(1)	The program must demonstrate that the appropriate
1826		level of supervision in place for all fellows is based on
1827		each fellow's level of training and ability, as well as
1828		patient complexity and acuity. Supervision may be
1829		exercised through a variety of methods, as appropriate
1830		to the situation. (Core)
1831		
1832	VI.A.2.b).(2)	The program must define when physical presence of a
1833		supervising physician is required. (Core)
1834		
1835	VI.A.2.c)	Levels of Supervision
1836		
1837		To promote appropriate fellow supervision while providing
1838		for graded authority and responsibility, the program must use
1839		the following classification of supervision: (Core)
1840		
1841	VI.A.2.c).(1)	Direct Supervision:

1842		
1843	VI.A.2.c).(1).(a)	the supervising physician is physically present

1872	VI.A.2.d).(2)	Faculty members functioning as supervising
1873		physicians must delegate portions of care to fellows
1874		based on the needs of the patient and the skills of
1875		each fellow. (Core)
1876		
1877	VI.A.2.d).(3)	Fellows should serve in a supervisory role to junior
1878	, , ,	fellows and residents in recognition of their progress
1879		toward independence, based on the needs of each
1880		patient and the skills of the individual resident or
1881		fellow. (Detail)
1882		
1883	VI.A.2.e)	Programs must set guidelines for circumstances and events
1884		in which fellows must communicate with the supervising
1885		faculty member(s). (Core)
1886		
1887	VI.A.2.e).(1)	Each fellow must know the limits of their scope of
1888		authority, and the circumstances under which the
1889		fellow is permitted to act with conditional
1890		independence. (Outcome)
1891		

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

1892		
1893	VI.A.2.f)	Faculty supervision assignments must be of sufficient
1894		duration to assess the knowledge and skills of each fellow
1895		and to delegate to the fellow the appropriate level of patient
1896		care authority and responsibility. (Core)
1897		
1898	VI.B.	Professionalism
1899		
1900	VI.B.1.	Programs, in partnership with their Sponsoring Institutions, must
1901		educate fellows and faculty members concerning the professional
1902		responsibilities of physicians, including their obligation to be
1903		appropriately rested and fit to provide the care required by their
1904		patients. (Core)
1905		
1906	VI.B.2.	The learning objectives of the program must:
1907		
1908	VI.B.2.a)	be accomplished through an appropriate blend of supervised
1909	·	patient care responsibilities, clinical teaching, and didactic
1910		educational events; (Core)
1911		
1912	VI.B.2.b)	be accomplished without excessive reliance on fellows to
1913	•	fulfill non-physician obligations; and, (Core)
1914		

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1915 1916 VI.B.2.c) ensure manageable patient care responsibilities. (Core)

Background and Intent: The Common Program Requirements do not define "manageable patient care responsibilities" as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1918
1919 VI.B.3. The program director, in partnership with the Sponsoring Institution,
1920 must provide a culture of professionalism that supports patient
1921 safety and personal responsibility. (Core)

1922		
1923	VI.B.4.	Fellows and faculty members must demonstrate an understanding
1924		of their personal role in the:
1925		
1926	VI.B.4.a)	provision of patient- and family-centered care; (Outcome)
1927		
1928	VI.B.4.b)	safety and welfare of patients entrusted to their care,
1929		including the ability to report unsafe conditions and adverse
1930		events; (Outcome)
1931		

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

1933 VI.B.4.c)

4000

1932

1934

1962

assurance of their fitness for work, including: (Outcome)

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

VI.B.4.c).(1)	management of their time before, during, and after
	clinical assignments; and, (Outcome)
VI.B.4.c).(2)	recognition of impairment, including from illness,
	fatigue, and substance use, in themselves, their peers,
	and other members of the health care team. (Outcome)
VI.B.4.d)	commitment to lifelong learning; (Outcome)
VI.B.4.e)	monitoring of their patient care performance improvement
	indicators; and, (Outcome)
VI.B.4.f)	accurate reporting of clinical and educational work hours,
	patient outcomes, and clinical experience data. (Outcome)
VI.B.5.	All fellows and faculty members must demonstrate responsiveness
	to patient needs that supersedes self-interest. This includes the
	recognition that under certain circumstances, the best interests of
	the patient may be served by transitioning that patient's care to
	another qualified and rested provider. (Outcome)
VI.B.6.	Programs, in partnership with their Sponsoring Institutions, must
	provide a professional, equitable, respectful, and civil environment
	that is free from discrimination, sexual and other forms of
	harassment, mistreatment, abuse, or coercion of students, fellows,
	faculty, and staff. <sup>(Core)</sup>
	VI.B.4.c).(2)  VI.B.4.d)  VI.B.4.e)  VI.B.4.f)

VI.B.7. Programs, in partnership with their Sponsoring Institutions, should have a process for education of fellows and faculty regarding unprofessional behavior and a confidential process for reporting, investigating, and addressing such concerns. (Core)

# VI.C. Well-Being

Psychological, emotional, and physical well-being are critical in the development of the competent, caring, and resilient physician and require proactive attention to life inside and outside of medicine. Well-being requires that physicians retain the joy in medicine while managing their own real-life stresses. Self-care and responsibility to support other members of the health care team are important components of professionalism; they are also skills that must be modeled, learned, and nurtured in the context of other aspects of fellowship training.

Fellows and faculty members are at risk for burnout and depression. Programs, in partnership with their Sponsoring Institutions, have the same responsibility to address well-being as other aspects of resident competence. Physicians and all members of the health care team share responsibility for the well-being of each other. For example, a culture which encourages covering for colleagues after an illness without the expectation of reciprocity reflects the ideal of professionalism. A positive culture in a clinical learning environment models constructive behaviors, and prepares fellows with the skills and attitudes needed to thrive throughout their careers.

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website: <a href="https://www.acgme.org/physicianwellbeing">www.acgme.org/physicianwellbeing</a>.

The ACGME also created a repository for well-being materials, assessments, presentations, and more on the <u>Well-Being Tools and Resources page</u> in Learn at ACGME for programs seeking to develop or strengthen their own well-being initiatives. There are many activities that programs can implement now to assess and support physician well-being. These include the distribution and analysis of culture of safety surveys, ensuring the availability of counseling services, and paying attention to the safety of the entire health care team.

VI.C.1. The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:

VI.C.1.a) efforts to enhance the meaning that each fellow finds in the experience of being a physician, including protecting time

with patients, minimizing non-physician obligations,

providing administrative support, promoting progressive

1998		autonomy and flexibility, and enhancing professional
1999		relationships; <sup>(Core)</sup>
2000		
2001	VI.C.1.b)	attention to scheduling, work intensity, and work
2002	•	compression that impacts fellow well-being; (Core)
2003		
2004	VI.C.1.c)	evaluating workplace safety data and addressing the safety of
2005	•	fellows and faculty members; (Core)
2006		•
	Background and	Intent: This requirement emphasizes the responsibility shared by the

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

VI.C.1.d)

policies and programs that encourage optimal fellow and faculty member well-being; and, (Core)

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

VI.C.1.d).(1)

Fellows must be given the opportunity to attend medical, mental health, and dental care appointments, including those scheduled during their working hours.

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

**VI.C.** 2019

 VI.C.1.e) attention to fellow and faculty member burnout, depression, and substance use disorder. The program, in partnership wi

and substance use disorder. The program, in partnership with its Sponsoring Institution, must educate faculty members and fellows in identification of the symptoms of burnout, depression, and substance use disorder, including means to assist those who experience these conditions. Fellows and faculty members must also be educated to recognize those symptoms in themselves and how to seek appropriate care. The program, in partnership with its Sponsoring Institution, must: (Core)

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance use disorder. Materials and more information are available in Learn at ACGME (https://dl.acgme.org/pages/well-being-tools-resources).

2030	VI.C.1.e).(1)	encourage fellows and faculty members to alert the
2031		program director or other designated personnel or
2032		programs when they are concerned that another
2033		fellow, resident, or faculty member may be displaying
2034		signs of burnout, depression, a substance use
2035		disorder, suicidal ideation, or potential for violence;
2036		(Core)
2037		

Background and Intent: Individuals experiencing burnout, depression, substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

VI.C.1.e).(2)	provide access to appropriate tools for self-screening; and, $^{(\text{Core})}$
VI.C.1.e).(3)	provide access to confidential, affordable mental health assessment, counseling, and treatment, including access to urgent and emergent care 24 hours a day, seven days a week. (Core)

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

2047		
2048	VI.C.2.	There are circumstances in which fellows may be unable to attend
2049		work, including but not limited to fatigue, illness, family
2050		emergencies, and parental leave. Each program must allow an
2051		appropriate length of absence for fellows unable to perform their
2052		patient care responsibilities. (Core)
2053		
2054	VI.C.2.a)	The program must have policies and procedures in place to
2055	•	ensure coverage of patient care. (Core)

2056		
2057	VI.C.2.b)	These policies must be implemented without fear of negative
2058		consequences for the fellow who is or was unable to provide
2059		the clinical work. <sup>(Core)</sup>
2060		

2061

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

VI.D.	Fatigue Mitigation
VI.D.1.	Programs must:
VI.D.1.a)	educate all faculty members and fellows to recognize the
•	signs of fatigue and sleep deprivation; (Core)
VI.D.1.b)	educate all faculty members and fellows in alertness
•	management and fatigue mitigation processes; and, (Core)
VI.D.1.c)	encourage fellows to use fatigue mitigation processes to
•	manage the potential negative effects of fatigue on patient
	care and learning. (Detail)
	VI.D.1. VI.D.1.a) VI.D.1.b)

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

VI.D.2.	Each program must ensure continuity of patient care, consistent
	with the program's policies and procedures referenced in VI.C.2-
	VI.C.2.b), in the event that a fellow may be unable to perform their
	patient care responsibilities due to excessive fatigue. (Core)
VI.D.3.	The program, in partnership with its Sponsoring Institution, must
	ensure adequate sleep facilities and safe transportation options for
	fellows who may be too fatigued to safely return home. (Core)
VI.E.	Clinical Responsibilities, Teamwork, and Transitions of Care
	VI.D.3.

2088	VI.E.1.	Clinical Responsibilities
2089		-

2090

2091

2092 2093

2094

The clinical responsibilities for each fellow must be based on PGY level, patient safety, fellow ability, severity and complexity of patient illness/condition, and available support services. (Core)

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

2095	VI.E.2.	Teamwork
2096 2097 2098 2099 2100 2101 2102		Fellows must care for patients in an environment that maximizes communication. This must include the opportunity to work as a member of effective interprofessional teams that are appropriate to the delivery of care in the subspecialty and larger health system.  (Core)
2103 2104	VI.E.3.	Transitions of Care
2105 2106 2107 2108	VI.E.3.a)	Programs must design clinical assignments to optimize transitions in patient care, including their safety, frequency, and structure. (Core)
2109 2110 2111 2112 2113	VI.E.3.b)	Programs, in partnership with their Sponsoring Institutions, must ensure and monitor effective, structured hand-over processes to facilitate both continuity of care and patient safety. (Core)
2114 2115 2116 2117	VI.E.3.c)	Programs must ensure that fellows are competent in communicating with team members in the hand-over process. (Outcome)
2118 2119 2120 2121	VI.E.3.d)	Programs and clinical sites must maintain and communicate schedules of attending physicians and fellows currently responsible for care. (Core)
2122 2123 2124 2125 2126 2127	VI.E.3.e)	Each program must ensure continuity of patient care, consistent with the program's policies and procedures referenced in VI.C.2-VI.C.2.b), in the event that a fellow may be unable to perform their patient care responsibilities due to excessive fatigue or illness, or family emergency. (Core)
2128 2129	VI.F.	Clinical Experience and Education

2130 Programs, in partnership with their Sponsoring Institutions, must design 2131 an effective program structure that is configured to provide fellows with 2132 educational and clinical experience opportunities, as well as reasonable 2133 opportunities for rest and personal activities.

Background and Intent: In the new requirements, the terms "clinical experience and education," "clinical and educational work," and "clinical and educational work hours" replace the terms "duty hours," "duty periods," and "duty." These changes have been made in response to concerns that the previous use of the term "duty" in reference to number of hours worked may have led some to conclude that fellows' duty to "clock out" on time superseded their duty to their patients.

VI.F.1. Maximum Hours of Clinical and Educational Work per Week

Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting. (Core)

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

## Scheduling

21352136

21372138

2139

2140

21412142

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

### **Oversight**

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

#### Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be

structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

VI.F.2.	Mandatory Time Free of Clinical Work and Education
VI.F.2.a)	The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. (Core)
VI.F.2.b)	Fellows should have eight hours off between scheduled
···· · <b>2</b> ·· <b>2</b> )	clinical work and education periods. (Detail)
VI.F.2.b).(1)	There may be circumstances when fellows choose to
	stay to care for their patients or return to the hospital
	with fewer than eight hours free of clinical experience
	and education. This must occur within the context of
	the 80-hour and the one-day-off-in-seven
	requirements. (Detail)
	•

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

2161 2162

Fellows must have at least 14 hours free of clinical work and VI.F.2.c) education after 24 hours of in-house call. (Core)

2163 2164

> Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

2165

VI.F.2.d) Fellows must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. (Core)

2170

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

2171

2172 VI.F.3. **Maximum Clinical Work and Education Period Length** 2173 2174 VI.F.3.a) Clinical and educational work periods for fellows must not 2175 exceed 24 hours of continuous scheduled clinical assignments. (Core) 2176 2177 2178 VI.F.3.a).(1) Up to four hours of additional time may be used for 2179 activities related to patient safety, such as providing effective transitions of care, and/or fellow education. 2181

2180

2182 2183

2184

Additional patient care responsibilities must not be assigned to a fellow during this time. (Core)

VI.F.3.a).(1).(a)

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

VI.F.4.	Clinical and Educational Work Hour Exceptions
VI.F.4.a)	In rare circumstances, after handing off all other
	responsibilities, a fellow, on their own initiative, may elect to
	remain or return to the clinical site in the following
	circumstances:
VI.F.4.a).(1)	to continue to provide care to a single severely ill or
	unstable patient; (Detail)
VI.F.4.a).(2)	humanistic attention to the needs of a patient or
	family; or, <sup>(Detail)</sup>
VI.F.4.a).(3)	to attend unique educational events. (Detail)
VI.F.4.b)	These additional hours of care or education will be counted
	toward the 80-hour weekly limit. (Detail)

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

2205		
2206	VI.F.4.c)	A Review Committee may grant rotation-specific exceptions
2207		for up to 10 percent or a maximum of 88 clinical and
2208		educational work hours to individual programs based on a
2209		sound educational rationale.
2210		
2211		The Review Committee for Internal Medicine will not consider
2212		requests for exceptions to the 80-hour limit to the fellows' work
2213		week.
2214		
2215	VI.F.5.	Moonlighting
2216		
2217	VI.F.5.a)	Moonlighting must not interfere with the ability of the fellow
2218		to achieve the goals and objectives of the educational

	program, and must not interfere with the fellow's fitness work nor compromise patient safety. (Core)
VI.F.5.b)	Time spent by fellows in internal and external moonlighti (as defined in the ACGME Glossary of Terms) must be counted toward the 80-hour maximum weekly limit. (Core)
moonlighting, p	nd Intent: For additional clarification of the expectations related to blease refer to the Common Program Requirement FAQs (available at me.org/What-We-Do/Accreditation/Common-Program-Requirements).
VI.F.6.	In-House Night Float
	Night float must occur within the context of the 80-hour and one day-off-in-seven requirements. (Core)
	d Intent: The requirement for no more than six consecutive nights of removed to provide programs with increased flexibility in scheduling
VI.F.7.	Maximum In-House On-Call Frequency
	Fellows must be scheduled for in-house call no more frequently every third night (when averaged over a four-week period). (Core)
VI.F.7.a)	Internal Medicine fellowships must not average in-house call a four-week period. (Core)
VI.F.8.	At-Home Call
VI.F.8.a)	Time spent on patient care activities by fellows on at-hon call must count toward the 80-hour maximum weekly limi. The frequency of at-home call is not subject to the everythird-night limitation, but must satisfy the requirement for day in seven free of clinical work and education, when averaged over four weeks. (Core)
VI.F.8.a).(1)	At-home call must not be so frequent or taxing as preclude rest or reasonable personal time for each fellow. (Core)
VI.F.8.b)	Fellows are permitted to return to the hospital while on at home call to provide direct care for new or established patients. These hours of inpatient patient care must be included in the 80-hour maximum weekly limit. (Detail)

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-

home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
