ACGME Program Requirements for Graduate Medical Education in Psychiatry

Common Program Requirements (Residency) are in BOLD

Where applicable, text in italics describes the underlying philosophy of the requirements in that section. These philosophic statements are not program requirements and are therefore not citable.

Introduction

Int.A.

Graduate medical education is the crucial step of professional development between medical school and autonomous clinical practice. It is in this vital phase of the continuum of medical education that residents learn to provide optimal patient care under the supervision of faculty members who not only instruct, but serve as role models of excellence, compassion, professionalism, and scholarship.

Graduate medical education transforms medical students into physician scholars who care for the patient, family, and a diverse community; create and integrate new knowledge into practice; and educate future generations of physicians to serve the public. Practice patterns established during graduate medical education persist many years later.

 Graduate medical education has as a core tenet the graded authority and responsibility for patient care. The care of patients is undertaken with appropriate faculty supervision and conditional independence, allowing residents to attain the knowledge, skills, attitudes, and empathy required for autonomous practice. Graduate medical education develops physicians who focus on excellence in delivery of safe, equitable, affordable, quality care; and the health of the populations they serve. Graduate medical education values the strength that a diverse group of physicians brings to medical care.

Graduate medical education occurs in clinical settings that establish the foundation for practice-based and lifelong learning. The professional development of the physician, begun in medical school, continues through faculty modeling of the effacement of self-interest in a humanistic environment that emphasizes joy in curiosity, problem-solving, academic rigor, and discovery. This transformation is often physically, emotionally, and intellectually demanding and occurs in a variety of clinical learning environments committed to graduate medical education and the well-being of patients, residents, fellows, faculty members, students, and all members of the health care team.

Int.B. Definition of Specialty

Psychiatry is a medical specialty focused on the prevention, diagnosis, and treatment of behavioral, addictive, and emotional disorders. Graduates will possess sound clinical judgment, requisite skills, and a high order of knowledge about the diagnosis, treatment, and prevention of all psychiatric disorders,

together with other common medical and neurological disorders that relate to the practice of psychiatry. (Core)*

Int.C. Length of Educational Program

The educational program in psychiatry must be 48 months in length. (Core)

I. Oversight

I.A. Sponsoring Institution

The Sponsoring Institution is the organization or entity that assumes the ultimate financial and academic responsibility for a program of graduate medical education, consistent with the ACGME Institutional Requirements.

When the Sponsoring Institution is not a rotation site for the program, the most commonly utilized site of clinical activity for the program is the primary clinical site.

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the residents. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

I.A.1. The program must be sponsored by one ACGME-accredited Sponsoring Institution. (Core)*

I.B. Participating Sites

A participating site is an organization providing educational experiences or educational assignments/rotations for residents.

- I.B.1. The program, with approval of its Sponsoring Institution, must designate a primary clinical site. (Core)
- I.B.2. There must be a program letter of agreement (PLA) between the program and each participating site that governs the relationship between the program and the participating site providing a required assignment. (Core)

I.B.2.a) The PLA must:

- I.B.2.a).(1) be renewed at least every 10 years; and, (Core)
- 92 I.B.2.a).(2) be approved by the designated institutional official (DIO). (Core)

94		
95	I.B.3.	The program must monitor the clinical learning and working
96		environment at all participating sites. (Core)
97		
98	I.B.3.a)	At each participating site there must be one faculty m
99	•	designated by the program director as the site director
100		is accountable for resident education at that site, in

articipating site there must be one faculty member, ed by the program director as the site director, who is accountable for resident education at that site, in collaboration with the program director. (Core)

Background and Intent: While all residency programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites the program must ensure the quality of the educational experience. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for residents
- Specifying the responsibilities for teaching, supervision, and formal evaluation of residents
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern resident education during the assignment

103 104 I.B.4. The program director must submit any additions or deletions of participating sites routinely providing an educational experience, 105 106 required for all residents, of one month full time equivalent (FTE) or 107 more through the ACGME's Accreditation Data System (ADS). (Core) 108

I.B.5. The number of and distance between participating sites must allow for full participation by residents in all organized educational aspects of the program. (Core)

I.C. The program, in partnership with its Sponsoring Institution, must engage in practices that focus on mission-driven, ongoing, systematic recruitment and retention of a diverse and inclusive workforce of residents, fellows (if present), faculty members, senior administrative staff members, and other relevant members of its academic community. (Core)

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

109

111 112

113

114

115

116 117

118

101

120 121	I.D.	Resources
122 123 124 125	I.D.1.	The program, in partnership with its Sponsoring Institution, must ensure the availability of adequate resources for resident education. (Core)
126 127 128 129	I.D.1.a)	Organized clinical services in inpatient, outpatient, emergency, consultation-liaison, and child and adolescent psychiatry must be available. (Core)
130 131 132 133	I.D.1.b)	There must be offices designated for residents to use to interview patients and accomplish their clinical duties in a professional manner. (Core)
134 135 136 137	I.D.1.c)	There must be specifically-designated areas for residents to use to perform basic physical examinations and other necessary diagnostic procedures and treatment interventions. (Core)
138 139 140 141	I.D.1.d)	There must be educational space and equipment, with the capability to record and playback specifically designated for seminars, lectures, and other educational activities. (Core)
142 143 144	I.D.1.e)	There must be equipment with the capacity for recording and viewing clinical encounters available to residents. (Core)
145 146 147 148	I.D.1.f)	There must be patients of different ages and genders from across the life cycle and from a variety of ethnic, racial, sociocultural, and economic backgrounds. (Core)
149 150 151 152	I.D.1.g)	There must be an inpatient population that is acutely ill and represents a diverse clinical spectrum of diagnoses, ages, and genders. (Core)
153 154 155	I.D.1.h)	Patient services that are comprehensive and continuous must be available. (Detail)
156 157 158	I.D.1.i)	Allied medical and ancillary staff members must be available for back-up support. (Core)
159 160 161 162	I.D.2.	The program, in partnership with its Sponsoring Institution, must ensure healthy and safe learning and working environments that promote resident well-being and provide for: (Core)
163 164	I.D.2.a)	access to food while on duty; (Core)
165 166 167 168	I.D.2.b)	safe, quiet, clean, and private sleep/rest facilities available and accessible for residents with proximity appropriate for safe patient care; (Core)

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that residents function at

their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while residents are working. Residents should have access to refrigeration where food may be stored. Food should be available when residents are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued resident.

I.D.2.c) clean and private facilities for lactation that have refrigeration capabilities, with proximity appropriate for safe patient care;

Background and Intent: Sites must provide private and clean locations where residents may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the resident with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the resident and the resident's family, as outlined in VI.C.1.d).(1).

I.D.2.d) security and safety measures appropriate to the participating site; and, (Core)

178 I.D.2.e) accommodations for residents with disabilities consistent with the Sponsoring Institution's policy. (Core)

I.D.3. Residents must have ready access to specialty-specific and other appropriate reference material in print or electronic format. This must include access to electronic medical literature databases with full text capabilities. (Core)

I.D.4. The program's educational and clinical resources must be adequate to support the number of residents appointed to the program. (Core)

I.E. The presence of other learners and other care providers, including, but not limited to, residents from other programs, subspecialty fellows, and advanced practice providers, must enrich the appointed residents' education. (Core)

I.E.1. The program must report circumstances when the presence of other learners has interfered with the residents' education to the DIO and Graduate Medical Education Committee (GMEC). (Core)

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that residents' education is not compromised by the presence of other providers and learners.

199 II. Personnel 200 201 II.A. **Program Director** 202 II.A.1. 203 There must be one faculty member appointed as program director 204 with authority and accountability for the overall program, including 205 compliance with all applicable program requirements. (Core) 206 207 II.A.1.a) The Sponsoring Institution's GMEC must approve a change in 208 program director. (Core) 209 210 II.A.1.b) Final approval of the program director resides with the **Review Committee**. (Core) 211 212

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a residency, a single individual must be designated as program director and have overall responsibility for the program. The program director's nomination is reviewed and approved by the GMEC. Final approval of the program directors resides with the applicable ACGME Review Committee.

II.A.1.c) The program must demonstrate retention of the program director for a length of time adequate to maintain continuity of leadership and program stability. (Core)

Background and Intent: The success of residency programs is generally enhanced by continuity in the program director position. The professional activities required of a program director are unique and complex and take time to master. All programs are encouraged to undertake succession planning to facilitate program stability when there is necessary turnover in the program director position.

The program director and, as applicable, the program's leadership team, must be provided with support adequate for administration of the program based upon its size and configuration. (Core)

Program leadership, in aggregate, must be provided with support equal to a dedicated minimum time specified below for administration of the program. This may be time spent by the program director only or divided between the program director and one or more associate (or assistant) program directors. Core

Number of Approved	Minimum support
Resident Positions	required (FTE)
<u>1-6</u>	0.2
<u>7-10</u>	0.4
<u>11-15</u>	<u>0.5</u>
<u>16-20</u>	<u>0.6</u>
<u>21-25</u>	<u>0.7</u>
<u>26-30</u>	0.8
<u>31-35</u>	0.9
36-40	1.0

220221222

223224225226

<u>41-45</u>	<u>1.1</u>
<u>46-50</u>	<u>1.2</u>
46-50 51-55 56-60	<u>1.3</u>
<u>56-60</u>	<u>1.4</u>
<u>61-65</u>	<u>1.5</u>
66-70 71-75	<u>1.6</u>
<u>71-75</u>	<u>1.7</u>
<u>76-80</u>	<u>1.8</u>
<u>81-85</u>	<u>1.9</u>
<u>86-90</u>	<u>2.0</u>

233

Additional support for the program director and the associate program director(s) must be provided based on program size as follows: (Core)

Number of Approved Resident Positions	Minimum Program Director FTE	Aggregate Program Director/Associate Program Director FTE
1-23	0.5	0.5
24-40	0.5	0.75
41-79	0.5	1.0
>79	0.5	1.5

234

239

235 236 II.A.2.b) 237

If the FTE is shared with an associate program director, the associate program director must report directly to the program director. (Core)

238

Background and Intent: To achieve successful graduate medical education, individuals serving as education and administrative leaders of residency programs, as well as those significantly engaged in the education, supervision, evaluation, and mentoring of residents, must have sufficient dedicated professional time to perform the vital activities required to sustain an accredited program.

The ultimate outcome of graduate medical education is excellence in resident education and patient care.

The program director and, as applicable, the program leadership team, devote a portion of their professional effort to the oversight and management of the residency program, as defined in II.A.4.-II.A.4.a).(16). Both provision of support for the time required for the leadership effort and flexibility regarding how this support is provided are important. Programs, in partnership with their Sponsoring Institutions, may provide support for this time in a variety of ways. Examples of support may include, but are not limited to, salary support, supplemental compensation, educational value units, or relief of time from other professional duties.

Program directors and, as applicable, members of the program leadership team, who are new to the role may need to devote additional time to program oversight and

management initially as they learn and become proficient in administering the program. It is suggested that during this initial period the support described above be increased as needed.

240 241

II.A.3. Qualifications of the program director:

242 243

II.A.3.a)

must include specialty expertise and at least three years of documented educational and/or administrative experience, or qualifications acceptable to the Review Committee; (Core)

244 245 246

Background and Intent: Leading a program requires knowledge and skills that are established during residency and subsequently further developed. The time period from completion of residency until assuming the role of program director allows the individual to cultivate leadership abilities while becoming professionally established. The three-year period is intended for the individual's professional maturation.

The broad allowance for educational and/or administrative experience recognizes that strong leaders arise through diverse pathways. These areas of expertise are important when identifying and appointing a program director. The choice of a program director should be informed by the mission of the program and the needs of the community.

In certain circumstances, the program and Sponsoring Institution may propose and the Review Committee may accept a candidate for program director who fulfills these goals but does not meet the three-year minimum.

247

248 **II.A.3.b)** 249

250251252253

254 255 256

II.A.3.c)

II.A.3.d)

must include current certification in the specialty for which they are the program director by the American Board of Psychiatry and Neurology (ABPN) or by the American Osteopathic Board of Neurology and Psychiatry, or specialty qualifications that are acceptable to the Review Committee;

must include current medical licensure and appropriate

medical staff appointment; and, (Core)

must include ongoing clinical activity. (Core)

Background and Intent: A program director is a role model for faculty members and residents. The program director must participate in clinical activity consistent with the specialty. This activity will allow the program director to role model the Core Competencies for the faculty members and residents.

260 261

262

II.A.4. Program Director Responsibilities

267 268 The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; resident recruitment and selection, evaluation, and promotion of residents, and disciplinary action; supervision of residents; and resident education in the context of patient care. (Core)

269 II.A.4.a) The program director must: 270 be a role model of professionalism; (Core) 271 II.A.4.a).(1) 272 Background and Intent: The program director, as the leader of the program, must serve as a role model to residents in addition to fulfilling the technical aspects of the role. As residents are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience. 273 274 II.A.4.a).(2) design and conduct the program in a fashion 275 consistent with the needs of the community, the 276 mission(s) of the Sponsoring Institution, and the mission(s) of the program; (Core) 277 278 Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities. 279 280 II.A.4.a).(3) administer and maintain a learning environment 281 conducive to educating the residents in each of the 282 ACGME Competency domains; (Core) 283 Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Residency programs can be highly complex. In a complex organization, the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience. 284 285 develop and oversee a process to evaluate candidates II.A.4.a).(4) 286 prior to approval as program faculty members for participation in the residency program education and 287 at least annually thereafter, as outlined in V.B.; (Core) 288 289 290 have the authority to approve program faculty II.A.4.a).(5) 291 members for participation in the residency program education at all sites; (Core) 292 293 294 II.A.4.a).(6) have the authority to remove program faculty 295 members from participation in the residency program

education at all sites; (Core)

298 299 300 301	II.A.4.a).(7)	have the authority to remove residents from supervising interactions and/or learning environments that do not meet the standards of the program; (Core)		
	Background and Intent: The program director has the responsibility to ensure that all who educate residents effectively role model the Core Competencies. Working with a resident is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.			
		There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.		
302 303 304	II.A.4.a).(8)	submit accurate and complete information required and requested by the DIO, GMEC, and ACGME; (Core)		
305 306 307 308 309	II.A.4.a).(9)	provide applicants who are offered an interview with information related to the applicant's eligibility for the relevant specialty board examination(s); (Core)		
310 311 312 313 314	II.A.4.a).(10)	provide a learning and working environment in which residents have the opportunity to raise concerns and provide feedback in a confidential manner as appropriate, without fear of intimidation or retaliation; (Core)		
315 316 317 318 319	II.A.4.a).(11)	ensure the program's compliance with the Sponsoring Institution's policies and procedures related to grievances and due process; (Core)		
320 321 322 323 324	II.A.4.a).(12)	ensure the program's compliance with the Sponsoring Institution's policies and procedures for due process when action is taken to suspend or dismiss, not to promote, or not to renew the appointment of a resident; (Core)		
325	Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and residents.			
326 327 328 329 330 331 332 333	II.A.4.a).(13)	ensure the program's compliance with the Sponsoring Institution's policies and procedures on employment and non-discrimination; (Core)		
	II.A.4.a).(13).(a)	Residents must not be required to sign a non-competition guarantee or restrictive covenant.		
334 335 336	II.A.4.a).(14)	document verification of program completion for all graduating residents within 30 days; (Core)		

II.A.4.a).(15) provide verification of an individual resident's completion upon the resident's request, within 30 days; and, (Core)

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of residents who have previously completed the program. Residents who leave the program prior to completion also require timely documentation of their summative evaluation.

II.A.4.a).(16)

obtain review and approval of the Sponsoring Institution's DIO before submitting information or requests to the ACGME, as required in the Institutional Requirements and outlined in the ACGME Program Director's Guide to the Common Program Requirements. (Core)

II.B. Faculty

Faculty members are a foundational element of graduate medical education – faculty members teach residents how to care for patients. Faculty members provide an important bridge allowing residents to grow and become practice-ready, ensuring that patients receive the highest quality of care. They are role models for future generations of physicians by demonstrating compassion, commitment to excellence in teaching and patient care, professionalism, and a dedication to lifelong learning. Faculty members experience the pride and joy of fostering the growth and development of future colleagues. The care they provide is enhanced by the opportunity to teach. By employing a scholarly approach to patient care, faculty members, through the graduate medical education system, improve the health of the individual and the population.

 Faculty members ensure that patients receive the level of care expected from a specialist in the field. They recognize and respond to the needs of the patients, residents, community, and institution. Faculty members provide appropriate levels of supervision to promote patient safety. Faculty members create an effective learning environment by acting in a professional manner and attending to the well-being of the residents and themselves.

Background and Intent: "Faculty" refers to the entire teaching force responsible for educating residents. The term "faculty," including "core faculty," does not imply or require an academic appointment.

II.B.1.

At each participating site, there must be a sufficient number of faculty members with competence to instruct and supervise all residents at that location. (Core)

II.B.2. Faculty members must:

II.B.2.a)	be role models of professionalism; (Core)
II.B.2.b)	demonstrate commitment to the delivery of safe, quality,
,	cost-effective, patient-centered care; (Core)
	II.B.2.a) II.B.2.b)

385

401

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

386 387 388	II.B.2.c)	demonstrate a strong interest in the education of residents; (Core)
389 390 391	II.B.2.d)	devote sufficient time to the educational program to fulfill their supervisory and teaching responsibilities; (Core)
392 393 394	II.B.2.e)	administer and maintain an educational environment conducive to educating residents; (Core)
395 396 397	II.B.2.f)	regularly participate in organized clinical discussions, rounds, journal clubs, and conferences; and, (Core)
398 399 400	II.B.2.g)	pursue faculty development designed to enhance their skills at least annually: (Core)

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the residency program faculty in the aggregate.

402	II.B.2.g).(1)	as educators; (Core)
403		
404	II.B.2.g).(2)	in quality improvement and patient safety; ^(Core)
405		
406	II.B.2.g).(3)	in fostering their own and their residents' well-being;
407		and, ^(Core)
408		
409	II.B.2.g).(4)	in patient care based on their practice-based learning
410		and improvement efforts. ^(Core)
411		

Background and Intent: Practice-based learning serves as the foundation for the practice of medicine. Through a systematic analysis of one's practice and review of the literature, one is able to make adjustments that improve patient outcomes and care. Thoughtful consideration to practice-based analysis improves quality of care, as well

as patient safety. This allows faculty members to serve as role models for residents in practice-based learning.

412 413 II.B.3. **Faculty Qualifications** 414 415 II.B.3.a) Faculty members must have appropriate qualifications in 416 their field and hold appropriate institutional appointments. 417 418 419 II.B.3.b) Physician faculty members must: 420 421 II.B.3.b).(1) have current certification in the specialty by the 422 American Board of Psychiatry and Neurology (ABPN) or 423 the American Osteopathic Board of Neurology and Psychiatry, or possess qualifications judged acceptable 424 to the Review Committee. (Core) 425 426 427 Any non-physician faculty members who participate in II.B.3.c) 428 residency program education must be approved by the 429 program director. (Core)

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of residents by non-physician educators enables the resident to better manage patient care and provides valuable advancement of the residents' knowledge. Furthermore, other individuals contribute to the education of the resident in the basic science of the specialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the residents, the program director may designate the individual as a program faculty member or a program core faculty member.

Core faculty members must have a significant role in the education and supervision of residents and must devote a significant portion of their entire effort to resident education and/or administration, and must, as a component of their activities, teach, evaluate, and provide formative feedback to residents. (Core)

Background and Intent: Core faculty members are critical to the success of resident education. They support the program leadership in developing, implementing, and assessing curriculum, mentoring residents, and assessing residents' progress toward achievement of competence in and the independent practice of the specialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program. Core faculty members may also be selected for their specific expertise and unique contribution to the program. Core faculty members are engaged in a broad range of activities, which may vary across programs and specialties. Core faculty members provide clinical teaching and supervision of residents, and also participate in non-clinical activities related to resident education and program administration. Examples of these non-clinical activities include, but are not limited to, interviewing and selecting resident

applicants, providing didactic instruction, mentoring residents, simulation exercises, completing the annual ACGME Faculty Survey, and participating on the program's Clinical Competency Committee, Program Evaluation Committee, and other GME committees.

CC	,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,	
II.B	.4.a)	Core faculty members must be designated by the program director. (Core)
II.B	.4.b)	Core faculty members must complete the annual ACGME Faculty Survey. (Core)
II.B	.4.c)	There must be at least five core faculty members within the program. (Core)
II.C	. Program Co	ordinator
II.C	.1. There	e must be a program coordinator. (Core)
II.C	supp	program coordinator must be provided with dedicated time and ort adequate for administration of the program based upon its and configuration. (Core)
II.C	C.2.a)	At a minimum, the program coordinator must be provided with the dedicated time and support specified below for administration of the program: (Core)

Number of Approved Resident Positions	Minimum FTE
<u>1-6</u>	<u>0.5</u>
<u>7-10</u>	<u>0.7</u>
<u>11-15</u>	0.8
<u>16-20</u>	<u>0.9</u>
<u>21-25</u>	<u>1.0</u>
<u>26-30</u>	<u>1.1</u>
<u>31-35</u>	<u>1.2</u>
<u>36-40</u>	<u>1.3</u>
<u>41-45</u>	<u>1.4</u>
<u>46-50</u>	<u>1.5</u>
<u>51-55</u>	<u>1.6</u>
56-or more	<u>1.7</u>

Additional support must be provided based on program size as follows: (Core)

Number of Approved Resident Positions	Minimum FTE Coordinator(s) Required
1-23	0.5 FTE
24-40	1.0 FTE

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as otherwise titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison and facilitator between the learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a key member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management appropriate to the complexity of the program. Program coordinators are expected to develop in-depth knowledge of the ACGME and Program Requirements, including policies, and procedures. Program coordinators assist the program director in meeting accreditation requirements, educational programming, and support of residents.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer residents may not require a full-time coordinator; one coordinator may support more than one program.

468 469

II.D. Other Program Personnel

471 472 473

474

470

The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. (Core)

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one

475 476

III. Resident Appointments

477 478

III.A. Eligibility Requirements

479 480 481

An applicant must meet one of the following qualifications to be eligible for appointment to an ACGME-accredited program: (Core)

482 483

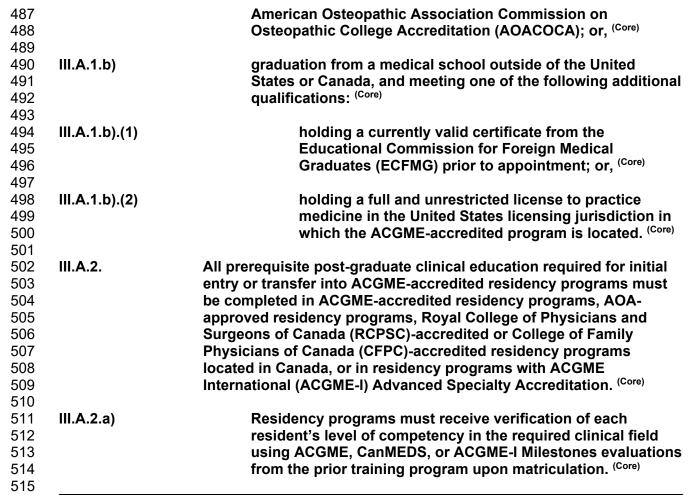

III.A.1.a)

III.A.1.

discipline.

484 485 486 Canada, accredited by the Liaison Committee on Medical Education (LCME) or graduation from a college of osteopathic medicine in the United States, accredited by the

graduation from a medical school in the United States or

Background and Intent: Programs with ACGME-I Foundational Accreditation or from institutions with ACGME-I accreditation do not qualify unless the program has also achieved ACGME-I Advanced Specialty Accreditation. To ensure entrants into ACGME-accredited programs from ACGME-I programs have attained the prerequisite milestones for this training, they must be from programs that have ACGME-I Advanced Specialty Accreditation.

III.A.3.

A physician who has completed a residency program that was not accredited by ACGME, AOA, RCPSC, CFPC, or ACGME-I (with Advanced Specialty Accreditation) may enter an ACGME-accredited residency program in the same specialty at the PGY-1 level and, at the discretion of the program director of the ACGME-accredited program and with approval by the GMEC, may be advanced to the PGY-2 level based on ACGME Milestones evaluations at the ACGME-accredited program. This provision applies only to entry into residency in those specialties for which an initial clinical year is not required for entry. (Core)

III.B. The program director must not appoint more residents than approved by the Review Committee. (Core)

531 III.B.1. All complement increases must be approved by the Review Committee. (Core) 532 533 534 III.B.2. Programs should have at least three residents at each level of education. 535 536 537 III.C. **Resident Transfers** 538 539 The program must obtain verification of previous educational experiences and a summative competency-based performance evaluation prior to 540 acceptance of a transferring resident, and Milestones evaluations upon 541 542 matriculation. (Core) 543 III.C.1. 544 If previous ACGME-accredited education was not in a psychiatry 545 program, residents may receive up to but no more than 12 months' credit 546 for prior education as part of the expected 48 months of the educational 547 program. (Core) 548 549 IV. **Educational Program** 550 551 The ACGME accreditation system is designed to encourage excellence and innovation in graduate medical education regardless of the organizational 552 553 affiliation, size, or location of the program. 554 555 The educational program must support the development of knowledgeable, skillful 556 physicians who provide compassionate care. 557 558 In addition, the program is expected to define its specific program aims consistent 559 with the overall mission of its Sponsoring Institution, the needs of the community it serves and that its graduates will serve, and the distinctive capabilities of 560 561 physicians it intends to graduate. While programs must demonstrate substantial 562 compliance with the Common and specialty-specific Program Requirements, it is 563 recognized that within this framework, programs may place different emphasis on 564 research, leadership, public health, etc. It is expected that the program aims will reflect the nuanced program-specific goals for it and its graduates; for example, it 565 566 is expected that a program aiming to prepare physician-scientists will have a 567 different curriculum from one focusing on community health. 568 569 IV.A. The curriculum must contain the following educational components: (Core) 570 IV.A.1. 571 a set of program aims consistent with the Sponsoring Institution's mission, the needs of the community it serves, and the desired 572 573 distinctive capabilities of its graduates; (Core) 574 The program's aims must be made available to program 575 IV.A.1.a) applicants, residents, and faculty members. (Core) 576 577 IV.A.2. 578 competency-based goals and objectives for each educational experience designed to promote progress on a trajectory to 579 580 autonomous practice. These must be distributed, reviewed, and available to residents and faculty members; (Core) 581

Background and Intent: The trajectory to autonomous practice is documented by Milestones evaluation. The Milestones detail the progress of a resident in attaining skill in each competency domain. They are developed by each specialty group and allow evaluation based on observable behaviors. Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific resident.

583 584

IV.A.3. delineation of resident responsibilities for patient care, progressive responsibility for patient management, and graded supervision: (Core)

585 586

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

587 588

IV.A.4. a broad range of structured didactic activities; (Core)

589 590

IV.A.4.a)

IV.A.6.

Residents must be provided with protected time to participate in core didactic activities. (Core)

591 592

Background and Intent: It is intended that residents will participate in structured didactic activities. It is recognized that there may be circumstances in which this is not possible. Programs should define core didactic activities for which time is protected and the circumstances in which residents may be excused from these didactic activities. Didactic activities may include, but are not limited to, lectures, conferences, courses, labs, asynchronous learning, simulations, drills, case discussions, grand rounds, didactic teaching, and education in critical appraisal of medical evidence.

593 594

IV.A.5. advancement of residents' knowledge of ethical principles foundational to medical professionalism; and, (Core)

advancement in the residents' knowledge of the basic principles of scientific inquiry, including how research is designed, conducted, evaluated, explained to patients, and applied to patient care. (Core)

599 600 601

IV.B. ACGME Competencies

602

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each specialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each specialty.

603 604

605

IV.B.1. The program must integrate the following ACGME Competencies into the curriculum: (Core)

606 607 608 609	IV.B.1.a)	Professionalism Residents must demonstrate a commitment to
610		professionalism and an adherence to ethical principles. (Core)
611		
612	IV.B.1.a).(1)	Residents must demonstrate competence in:
613		
614	IV.B.1.a).(1).(a)	compassion, integrity, and respect for others;
615		(Core)
616		
617	IV.B.1.a).(1).(b)	responsiveness to patient needs that
618		supersedes self-interest; (Core)
619		

Background and Intent: This includes the recognition that under certain circumstances, the interests of the patient may be best served by transitioning care to another provider. Examples include fatigue, conflict or duality of interest, not connecting well with a patient, or when another physician would be better for the situation based on skill set or knowledge base.

	Situation based on	skill set of knowledge base.
620		
621	IV.B.1.a).(1).(c)	respect for patient privacy and autonomy; (Core)
622		
623	IV.B.1.a).(1).(d)	accountability to patients, society, and the
624		profession; ^(Core)
625		
626	IV.B.1.a).(1).(e)	respect and responsiveness to diverse patient
627		populations, including but not limited to
628		diversity in gender, age, culture, race, religion,
629		disabilities, national origin, socioeconomic
630		status, and sexual orientation; (Core)
631		
632	IV.B.1.a).(1).(f)	ability to recognize and develop a plan for one's
633		own personal and professional well-being; and,
634		(Core)
635		
636	IV.B.1.a).(1).(g)	appropriately disclosing and addressing
637		conflict or duality of interest. (Core)
638		
639	IV.B.1.b)	Patient Care and Procedural Skills

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s Crossing the Quality Chasm: A New Health System for the 21st Century, 2001 and Berwick D, Nolan T, Whittington J. The Triple Aim: care, cost, and quality. Health Affairs. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with

input from the appropriate professional societies, certifying boards, and the community.		
IV.B.1.b).(1)	Residents must be able to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health. (Core)	
IV.B.1.b).(1).(a)	Residents must demonstrate competence in the evaluation and treatment of patients of different ages and genders from diverse backgrounds, and from a variety of ethnic, racial, sociocultural, and economic backgrounds; and; (Core)	
IV.B.1.b).(1).(b)	Residents must demonstrate competence in:	
IV.B.1.b).(1).(b).(i)	forging a therapeutic alliance with patients and their families of all ages and genders, from diverse backgrounds, and from a variety of ethnic, racial, sociocultural, and economic backgrounds; (Core)	
IV.B.1.b).(1).(b).(ii)	formulating a clinical diagnosis for patients by conducting patient interviews, (Core)	
IV.B.1.b).(1).(b).(iii)	eliciting a clear and accurate history; (Core)	
IV.B.1.b).(1).(b).(iv)	performing a physical, neurological, and mental status examination, including use of appropriate diagnostic studies; (Core)	
IV.B.1.b).(1).(b).(v)	completing a systematic recording of findings in the medical record; (Core)	
IV.B.1.b).(1).(b).(vi)	formulating an understanding of a patient's biological, psychological, behavioral, and sociocultural issues associated with etiology and treatment; (Core)	
IV.B.1.b).(1).(b).(vii)	developing a differential diagnosis and treatment plan for patients with psychiatric disorders; (Core)	

683

684 685 686

687

688

IV.B.1.b).(1).(b).(viii)

IV.B.1.b).(1).(b).(ix)

managing and treating patients using pharmacological regimens, including

concurrent use of medications and psychotherapy; (Core)

brief and long-term supportive,

managing and treating patients using both

689 690 691		psychodynamic, and cognitive-behavioral psychotherapies; (Core)
692 693 694	IV.B.1.b).(1).(b).(x)	providing psychiatric consultation in a variety of medical and surgical settings; (Core)
695 696 697 698 699	IV.B.1.b).(1).(b).(xi)	managing and treating chronically-mentally ill patients with appropriate psychopharmacologic, psychotherapeutic, and social rehabilitative interventions; (Core)
700 701 702 703 704	IV.B.1.b).(1).(b).(xii)	providing psychiatric care to patients receiving treatment from non-medical therapists and coordinating such treatment; and, (Core)
705 706 707 708 709 710	IV.B.1.b).(1).(b).(xiii)	recognizing and appropriately responding to family violence (e.g., child, partner, and elder physical, emotional, and sexual abuse and neglect) and its effect on both victims and perpetrators. (Core)
711 712 713 714	IV.B.1.b).(2)	Residents must be able to perform all medical, diagnostic, and surgical procedures considered essential for the area of practice. (Core)
715	IV.B.1.c)	Medical Knowledge
715 716 717 718 719 720	IV.B.1.c)	Medical Knowledge Residents must demonstrate knowledge of established and evolving biomedical, clinical, epidemiological and social-behavioral sciences, as well as the application of this knowledge to patient care. (Core)
715 716 717 718 719 720 721 722 723	IV.B.1.c)	Residents must demonstrate knowledge of established and evolving biomedical, clinical, epidemiological and social-behavioral sciences, as well as the application of this
715 716 717 718 719 720 721 722 723 724 725 726		Residents must demonstrate knowledge of established and evolving biomedical, clinical, epidemiological and social-behavioral sciences, as well as the application of this knowledge to patient care. (Core) Residents must demonstrate competence in their
715 716 717 718 719 720 721 722 723 724 725	IV.B.1.c).(1)	Residents must demonstrate knowledge of established and evolving biomedical, clinical, epidemiological and social-behavioral sciences, as well as the application of this knowledge to patient care. (Core) Residents must demonstrate competence in their knowledge of: major theoretical approaches to understanding the

740 741 742 743		incidence, prevalence, and long-term course and treatment of psychiatric disorders and conditions; (Core)
744 745 746 747 748 749 750 751	IV.B.1.c).(1).(d)	diagnosis and treatment of neurologic disorders commonly encountered in psychiatric practice, including neoplasm, dementia, headaches, traumatic brain injury, infectious diseases, movement disorders, neurocognitive disorders, seizure disorders, stroke, intractable pain, and other related disorders; (Core)
752 753 754 755 756 757	IV.B.1.c).(1).(e)	reliability and validity of the generally-accepted diagnostic techniques, including physical examination of the patient, laboratory testing, imaging, neurophysiologic and neuropsychological testing, and psychological testing; (Core)
758 759 760	IV.B.1.c).(1).(f)	indications for and uses of electroconvulsive and neuromodulation therapies; (Core)
761 762 763	IV.B.1.c).(1).(g)	history of psychiatry and its relationship to the evolution of medicine; (Core)
764 765	IV.B.1.c).(1).(h)	legal aspects of psychiatric practice; (Core)
766 767 768 769 770 771 772 773 774	IV.B.1.c).(1).(i)	aspects of American culture and subcultures, including immigrant populations, particularly those found in the patient community associated with the educational program, with specific focus on the cultural elements of the relationship between the resident and the patient, including the dynamics of differences in cultural identity, values and preferences, and power; and, (Core)
775 776 777	IV.B.1.c).(1).(j)	medical conditions that can affect evaluation and care of patients. (Core)
778 779	IV.B.1.d)	Practice-based Learning and Improvement
780 781 782 783		Residents must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. (Core)
784		

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a physician develop the habits of mind required to continuously pursue quality improvement, well past the completion of residency.

_	residency.	
35 36	IV.B.1.d).(1)	Residents must demonstrate competence in:
37 38 39	IV.B.1.d).(1).(a)	identifying strengths, deficiencies, and limits in one's knowledge and expertise; (Core)
90 91	IV.B.1.d).(1).(b)	setting learning and improvement goals; (Core)
92 93 94 95	IV.B.1.d).(1).(c)	identifying and performing appropriate learnin activities; (Core)
96 97 98 99	IV.B.1.d).(1).(d)	systematically analyzing practice using quality improvement methods, and implementing changes with the goal of practice improvemen (Core)
01 02 03	IV.B.1.d).(1).(e)	incorporating feedback and formative evaluation into daily practice; (Core)
03 04 05 06 07	IV.B.1.d).(1).(f)	locating, appraising, and assimilating evidence from scientific studies related to their patients health problems; and, (Core)
08 09 10	IV.B.1.d).(1).(g)	using information technology to optimize learning. (Core)
11 11 12	IV.B.1.e)	Interpersonal and Communication Skills
313 314 315 316		Residents must demonstrate interpersonal and communication skills that result in the effective exchange of information and collaboration with patients, their families, and health professionals. (Core)
117 118 119	IV.B.1.e).(1)	Residents must demonstrate competence in:
20 21 22 23 24	IV.B.1.e).(1).(a)	communicating effectively with patients, families, and the public, as appropriate, across a broad range of socioeconomic and cultural backgrounds; (Core)
25 26 27 28	IV.B.1.e).(1).(b)	communicating effectively with physicians, other health professionals, and health-related agencies; (Core)
29 30 31 32	IV.B.1.e).(1).(c)	working effectively as a member or leader of a health care team or other professional group; (Core)

833 834 835	IV.B.1.e).(1).(d)	educating patients, families, students, residents, and other health professionals; (Core)
836 837 838	IV.B.1.e).(1).(e)	acting in a consultative role to other physicians and health professionals; and, (Core)
839 840 841	IV.B.1.e).(1).(f)	maintaining comprehensive, timely, and legible medical records, if applicable. (Core)
842 843 844 845	IV.B.1.e).(2)	Residents must learn to communicate with patients and families to partner with them to assess their care goals, including, when appropriate, end-of-life goals. (Core)

861

862 863

864

865 866 Background and Intent: When there are no more medications or interventions that can achieve a patient's goals or provide meaningful improvements in quality or length of life, a discussion about the patient's goals, values, and choices surrounding the end of life is one of the most important conversations that can occur. Residents must learn to participate effectively and compassionately in these meaningful human interactions, for the sake of their patients and themselves.

Programs may teach this skill through direct clinical experience, simulation, or other means of active learning.

847		
848	IV.B.1.f)	Systems-based Practice
849		
850		Residents must demonstrate an awareness of and
851		responsiveness to the larger context and system of health
852		care, including the social determinants of health, as well as
853		the ability to call effectively on other resources to provide
854		optimal health care. ^(Core)
855		
856	IV.B.1.f).(1)	Residents must demonstrate competence in:
857	, , ,	·
858	IV.B.1.f).(1).(a)	working effectively in various health care
859	, , , , ,	delivery settings and systems relevant to their
860		clinical specialty; (Core)

Background and Intent: Medical practice occurs in the context of an increasingly complex clinical care environment where optimal patient care requires attention to compliance with external and internal administrative and regulatory requirements.

IV.B.1.f).(1).(b) coordinating patient care across the health care continuum and beyond as relevant to their clinical specialty; (Core)

Background and Intent: Every patient deserves to be treated as a whole person. Therefore it is recognized that any one component of the health care system does not meet the totality of the patient's needs. An appropriate transition plan requires

coordination and forethought by an interdisciplinary team. The patient benefits from proper care and the system benefits from proper use of resources.

867			
868	IV.B.1.f).(1).(c)	advocating for quality patient care and optimal
869			patient care systems; (Core)
870 871 872	IV.B.1.f).(1).(d))	working in interprofessional teams to enhance patient safety and improve patient care quality;
873			(Core)
874		_	
875 876 877	IV.B.1.f).(1).(e)	participating in identifying system errors and implementing potential systems solutions; (Core)
878 879 880 881	IV.B.1.f).(1).(f)		incorporating considerations of value, cost awareness, delivery and payment, and risk-benefit analysis in patient and/or population-based care as appropriate; (Core)
882 883 884 885	IV.B.1.f).(1).(g)	understanding health care finances and its impact on individual patients' health decisions;
886			
887 888 889 890	IV.B.1.f).(1).(h))	knowing how types of medical practice and delivery systems differ from one another, including methods of controlling health care cost, ensuring quality, and allocating resources; (Core)
891			anocating resources, v
892 893 894 895 896 897 898 899	IV.B.1.f).(1).(i)		practicing cost-effective health care and resource allocation that is aligned with high quality of care, including an understanding of the financing and regulation of psychiatric practice, as well as information about the structure of public and private organizations that influence mental health care; (Core)
900 901 902 903	IV.B.1.f).(1).(j)		assisting patients in dealing with system complexities and disparities in mental health care resources; and, (Core)
903 904 905 906	IV.B.1.f).(1).(k))	advocating for the promotion of mental health and the prevention of mental disorders. (Core)
907 908 909 910	IV.B.1.f).(2)	the he family'	ents must learn to advocate for patients within alth care system to achieve the patient's and 's care goals, including, when appropriate, endgoals. (Core)
911	IV C	Curriculum Organization as	ad Basidant Evparianas
912 913	IV.C.	Curriculum Organization ar	iu Resident Experiences

914 915 916 917	IV.C.1.	The curriculum must be structured to optimize resident educational experiences, the length of these experiences, and supervisory continuity. (Core)
918 919 920 921 922 923	IV.C.1.a)	Curriculum design must be consistent with the program's aims (IV.A.1.) and must demonstrate a systematic approach, with attention to evidence-based principles and scientific literature, standards of the psychiatric profession, and developmental appropriateness for learners. (Core)
924 925 926	IV.C.1.b)	The assignment of rotations must be structured to minimize the frequency of rotational transitions. (Core)

Background and Intent: In some specialties, frequent rotational transitions, inadequate continuity of faculty member supervision, and dispersed patient locations within the hospital have adversely affected optimal resident education and effective team-based care. The need for patient care continuity varies from specialty to specialty and by clinical situation, and may be addressed by the individual Review Committee.

927		
928 929 930 931	IV.C.2.	The program must provide instruction and experience in pain management if applicable for the specialty, including recognition of the signs of addiction. (Core)
932 933	IV.C.3.	Required Clinical Experiences
934 935 936 937	IV.C.3.a)	Residents must have major responsibility for the care of a sufficient number of patients to demonstrate competence with acute and chronic psychiatric illnesses. (Core)
938 939 940 941	IV.C.3.b)	There must be patient care assignments that permit residents to practice appropriate treatment, and to have sufficient time for other aspects of their educational program. (Core)
942 943 944 945	IV.C.3.b).(1)	These clinical responsibilities must be coordinated with and not impinge on the non-patient care aspects of the educational program. (Core)
946 947 948 949 950 951	IV.C.3.c)	There must be structured clinical experiences that are organized to provide opportunities to conduct initial evaluations, to participate in the subsequent diagnostic process, and to follow patients during the treatment phase and/or evolution of their psychiatric disorders/conditions. (Core)
952 953	IV.C.3.d)	The first year in psychiatry must include:
954 955 956	IV.C.3.d).(1)	a minimum of four months in a clinical setting that provides comprehensive clinical care; and, (Core)
957 958	IV.C.3.d).(1).(a)	This requirement should be met in a primary care specialty setting. (Detail)

959		
960	IV.C.3.d).(2)	no more than eight months FTE in psychiatry. (Core)
961 962 963 964 965	IV.C.3.e)	Resident experience in neurology must include two months FTE of supervised clinical experience in the diagnosis and treatment of patients with neurological disorders/conditions. (Core)
966 967 968	IV.C.3.e).(1)	At least one month of this experience should occur in the first or second year of the program. (Detail)
969 970 971 972	IV.C.3.f)	Resident experience in inpatient psychiatry must include at least six months, but no more than 16 months FTE, of inpatient psychiatry. (Core)
973 974 975 976 977	IV.C.3.f).(1)	This must include a minimum of six months of significant responsibility for the assessment, diagnosis, and treatment of general psychiatric patients who are admitted to traditional psychiatry units. (Core)
978 979 980	IV.C.3.g)	Resident experience in outpatient psychiatry must include 12 months FTE of organized, continuous, and supervised clinical experience. (Core)
981 982 983 984 985	IV.C.3.g).(1)	Each resident must have significant experience treating outpatients longitudinally for at least one year, to include: (Core)
986 987 988 989	IV.C.3.g).(1).(a)	initial evaluation and treatment of ongoing individual psychotherapy patients, some of whom should be seen weekly; (Core)
990 991 992 993 994	IV.C.3.g).(1).(b)	participation in multiple treatment modalities that emphasize developmental, biological, psychological, and social approaches to outpatient treatment; (Core)
994 995 996 997 998 999 1000 1001 1002 1003 1004 1005	IV.C.3.g).(1).(c)	application of psychosocial rehabilitation techniques for the evaluation and treatment of differing disorders in a chronically-ill patient population; and, (Core)
	IV.C.3.g).(1).(d)	no more than 20 percent children and adolescent patients. (Core)
	IV.C.3.h)	Resident experience in child and adolescent psychiatry: must include two months FTE of organized clinical experience. (Core)
1003 1006 1007 1008	IV.C.3.h).(1)	Supervising faculty members must have current ABPN certification in child and adolescent psychiatry. (Core)
1009	IV.C.3.h).(2)	Residents must participate in assessing, evaluating, and

1010 1011 1012 1013		treating a variety of diagnoses in male and female children and adolescents and their families, using a variety of interventional modalities. (Core)
1014 1015 1016 1017	IV.C.3.i)	Resident experience in geriatric psychiatry must include one month FTE of organized experience focused on areas unique to the care of the elderly. (Core)
1018 1019 1020	IV.C.3.i).(1)	Each resident's geriatric psychiatry experience must include:
1021 1022 1023 1024	IV.C.3.i).(1).(a)	diagnosis and management of mental disorders in geriatric patients with coexistent medical disorders; (Core)
1025 1026 1027 1028	IV.C.3.i).(1).(b)	diagnosis and management, including management of the cognitive component, of degenerative disorders; (Core)
1029 1030 1031	IV.C.3.i).(1).(c)	basic neuropsychological testing of cognitive functioning in the elderly; and, (Core)
1032 1033	IV.C.3.i).(1).(d)	management of drug interactions. (Core)
1034 1035 1036 1037 1038	IV.C.3.j)	Resident experience in addiction psychiatry must include one month FTE of organized experience focused on the evaluation and clinical management of patients with substance use disorder/dependence problems, including dual diagnosis. (Core)
1039 1040 1041	IV.C.3.j).(1)	Residents must have experience with treatment modalities that include:
1042 1043 1044	IV.C.3.j).(1).(a)	detoxification, overdose management, and maintenance pharmacotherapy; (Core)
1045 1046 1047 1048 1049 1050 1051	IV.C.3.j).(1).(b)	the use of therapeutic techniques that address the psychological and social consequences of addiction, to include confronting and intervening in chronic addiction rehabilitation used in recovery stages from pre-contemplation to maintenance; and, (Core)
1052 1053	IV.C.3.j).(1).(c)	self-help groups. (Core)
1054 1055 1056 1057	IV.C.3.k)	Resident experience in consultation-liaison psychiatry must include two months FTE in which residents consult, under supervision, on other medical and surgical services. (Core)
1057 1058 1059 1060	IV.C.3.I)	Resident experience in forensic psychiatry must include experience evaluating patients' potential to harm themselves or others, appropriateness for commitment, decisional capacity,

1061		disability, and competency. (Core)
1062 1063 1064 1065	IV.C.3.m)	Resident experience in emergency psychiatry must be conducted in an organized, supervised psychiatric emergency service. (Core)
1065 1066 1067 1068	IV.C.3.m).(1)	This experience must not be counted as part of the 12-month outpatient requirement. (Core)
1069 1070 1071	IV.C.3.m).(2)	Resident experiences must include crisis evaluation and management, and triage of psychiatric patients. (Core)
1071 1072 1073 1074	IV.C.3.m).(3)	On-call experiences alone must not fulfill the requirement for resident experience in emergency psychiatry. (Detail)
1075 1076 1077 1078 1079 1080	IV.C.3.n)	Resident experience in community psychiatry must provide residents with a cohort of persistently and chronically-ill patients in the public sector, such as in community mental health centers, public hospitals and agencies, and other community-based settings. (Core)
1081 1082 1083 1084 1085 1086	IV.C.3.n).(1)	This experience must include learning about, and using community resources and services in planning patient care, as well as consulting and working collaboratively with case managers, crisis teams, and other mental health professionals. (Core)
1087 1088 1089 1090	IV.C.3.o)	Electives must have written curriculum with goals and objectives, and learning experiences that lead to specified learning outcomes.
1091 1092 1093 1094	IV.C.3.o).(1)	The choice of electives must be made with the advice and approval of the program director and the appropriate preceptor. (Core)
1094 1095 1096 1097 1098 1099 1100 1101	IV.C.4.	Residents at all levels must be provided at least two hours of faculty supervision weekly, one hour of which must be individual. (Core)
	IV.C.5.	Residents must have experience participating in psychiatric administration, especially leadership of interdisciplinary teams, including supervised experience in utilization review, quality assurance, and performance improvement. (Core)
1103 1104 1105 1106 1107 1108 1109 1110	IV.C.6.	For residents who enter subspecialty education in child and adolescent psychiatry prior to completing general psychiatry requirements, certain clinical experiences with children, adolescents, and families taken during the period when the resident is designated as a child and adolescent psychiatry resident may be counted toward general psychiatry requirements as well as child and adolescent requirements, thereby fulfilling program requirements in both general and child and adolescent psychiatry. The following guidelines must be met for these experiences: (Core)

1112 1113 1114	IV.C.6.a)	experience is limited to child and adolescent psychiatry patients;
1115 1116	IV.C.6.b)	no more than 12 months may be double-counted; (Core)
1117 1118 1119 1120	IV.C.6.c)	there must be documentation from the child and adolescent psychiatry program director for all areas for which credit is given in both programs; (Core)
1121 1122 1123 1124	IV.C.6.d)	there must be no reduction in total length of time devoted to education in child and adolescent psychiatry; and, (Core)
1124 1125 1126 1127	IV.C.6.e)	only the following experiences should be used to meet requirements in both general and child and adolescent psychiatry:
1128 1129	IV.C.6.e).(1)	one month FTE of child neurology; (Core)
1130 1131	IV.C.6.e).(2)	one month FTE of pediatric consultation; (Core)
1132 1133	IV.C.6.e).(3)	one month FTE of addiction psychiatry; (Core)
1134 1135	IV.C.6.e).(4)	forensic psychiatry experience; (Core)
1136 1137	IV.C.6.e).(5)	community psychiatry experience; and, (Core)
1138 1139 1140	IV.C.6.e).(6)	no more than 20 percent of the resident's psychiatry outpatient experience. (Core)
1141 1142 1143	IV.C.7.	Regularly scheduled didactic sessions must be a component of the program. (Core)
1144 1145 1146	IV.C.7.a)	Each resident should participate in a minimum of 70 percent of regularly scheduled didactic sessions. (Detail)
1147 1148 1149 1150 1151	IV.C.7.b)	Residents and faculty members should participate in journal clubs, research conferences, didactics, and/or other activities that address critical appraisal of the literature and understanding of the research process. (Detail)
1152 1153 1154 1155	IV.C.7.c)	Didactic instruction should include regularly scheduled lectures, seminars, and assigned readings that are coordinated with concurrent clinical experiences and are specific to each resident's level of education. (Detail)
1156 1157 1158	IV.D.	Scholarship
1159 1160 1161 1162		Medicine is both an art and a science. The physician is a humanistic scientist who cares for patients. This requires the ability to think critically, evaluate the literature, appropriately assimilate new knowledge, and practice lifelong learning. The program and faculty must create an

1163 environment that fosters the acquisition of such skills through resident 1164 participation in scholarly activities. Scholarly activities may include 1165 discovery, integration, application, and teaching. 1166 The ACGME recognizes the diversity of residencies and anticipates that 1167 programs prepare physicians for a variety of roles, including clinicians, 1168 1169 scientists, and educators. It is expected that the program's scholarship will 1170 reflect its mission(s) and aims, and the needs of the community it serves. 1171 For example, some programs may concentrate their scholarly activity on quality improvement, population health, and/or teaching, while other 1172 programs might choose to utilize more classic forms of biomedical 1173 1174 research as the focus for scholarship. 1175 IV.D.1. 1176 **Program Responsibilities** 1177 1178 The program must demonstrate evidence of scholarly IV.D.1.a) activities consistent with its mission(s) and aims. (Core) 1179 1180 1181 The program, in partnership with its Sponsoring Institution, IV.D.1.b) 1182 must allocate adequate resources to facilitate resident and faculty involvement in scholarly activities. (Core) 1183 1184 1185 IV.D.1.c) The program must advance residents' knowledge and practice of the scholarly approach to evidence-based patient 1186 care. (Core) 1187 1188

Background and Intent: The scholarly approach can be defined as a synthesis of teaching, learning, and research with the aim of encouraging curiosity and critical thinking based on an understanding of physiology, pathophysiology, differential diagnosis, treatments, treatment alternatives, efficiency of care, and patient safety. While some faculty members are responsible for fulfilling the traditional elements of scholarship through research, integration, and teaching, all faculty members are responsible for advancing residents' scholarly approach to patient care.

Elements of a scholarly approach to patient care include:

- Asking meaningful questions to stimulate residents to utilize learning resources to create a differential diagnosis, a diagnostic algorithm, and treatment plan
- Challenging the evidence that the residents use to reach their medical decisions so that they understand the benefits and limits of the medical literature
- When appropriate, dissemination of scholarly learning in a peer-reviewed manner (publication or presentation)
- Improving resident learning by encouraging them to teach using a scholarly approach

The scholarly approach to patient care begins with curiosity, is grounded in the principles of evidence-based medicine, expands the knowledge base through dissemination, and develops the habits of lifelong learning by encouraging residents to be scholarly teachers.

1189 1190

IV.D.2. Faculty Scholarly Activity

1191		
1192	IV.D.2.a)	Among their scholarly activity, programs must demonstrate
1193		accomplishments in at least three of the following domains:
1194		(Core)
1195		
1196		 Research in basic science, education, translational
1197		science, patient care, or population health
1198		Peer-reviewed grants
1199		 Quality improvement and/or patient safety initiatives
1200		 Systematic reviews, meta-analyses, review articles,
1201		chapters in medical textbooks, or case reports
1202		 Creation of curricula, evaluation tools, didactic
1203		educational activities, or electronic educational
1204		materials
1205		 Contribution to professional committees, educational
1206		organizations, or editorial boards
1207		 Innovations in education
1208		
1209	IV.D.2.b)	The program must demonstrate dissemination of scholarly
1210		activity within and external to the program by the following
1211		methods:
1212		

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program's effectiveness in the creation of an environment of inquiry that advances the residents' scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

1213		
1214	IV.D.2.b).(1)	faculty participation in grand rounds, posters,
1215		workshops, quality improvement presentations,
1216		podium presentations, grant leadership, non-peer-
1217		reviewed print/electronic resources, articles or
1218		publications, book chapters, textbooks, webinars,
1219		service on professional committees, or serving as a
1220		journal reviewer, journal editorial board member, or
1221		editor; (Outcome)‡
1222		
1223	IV.D.2.b).(2)	peer-reviewed publication. (Outcome)
1224		
1225	IV.D.3.	Resident Scholarly Activity
1226		
1227	IV.D.3.a)	Residents must participate in scholarship. (Core)
1228		
1229	IV.D.3.a).(1)	The program must provide residents with opportunities for
1230		research and development of research skills for residents

1231 1232		interested in conducting research in psychiatry or related fields. ^(Core)
1233		
1234	IV.D.3.a).(2)	The program must provide interested residents access to
1235		and the opportunity to participate actively in ongoing
1236		research under a mentor. (Core)
1237		
1238	IV.D.3.a).(3)	All residents must be educated in research literacy and in
1239		the concepts and process of evidence-based clinical
1240		practice to develop skills in question formulation,
1241		information searching, critical appraisal, and medical
1242		decision-making. ^(Core)
1243		

V. Evaluation

1245 1246

1244

V.A. Resident Evaluation

1247 1248

1249

V.A.1. Feedback and Evaluation

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower residents to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring resident learning* and providing ongoing feedback that can be used by residents to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- residents identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where residents are struggling and address problems immediately

Summative evaluation is evaluating a resident's learning by comparing the residents against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when residents or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the residency program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a neophyte physician to one with growing expertise.

1250 1251

V.A.1.a)

Faculty members must directly observe, evaluate, and frequently provide feedback on resident performance during each rotation or similar educational assignment. (Core)

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Residents require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for residents who have deficiencies that may result in a poor final rotation evaluation.

1255		
1256	V.A.1.b)	Evaluation must be documented at the completion of the
1257		assignment. (Core)
1258	V A 4 I \ /4\	
1259	V.A.1.b).(1)	For block rotations of greater than three months in
1260		duration, evaluation must be documented at least
1261		every three months. (Core)
1262	V/ A 4 I-) (0)	
1263	V.A.1.b).(2)	Longitudinal experiences, such as continuity clinic in
1264		the context of other clinical responsibilities, must be
1265 1266		evaluated at least every three months and at
1266		completion. (Core)
1267	\/ A 1 a\	The program must provide an objective performance
1269	V.A.1.c)	The program must provide an objective performance evaluation based on the Competencies and the specialty-
1209		specific Milestones, and must: (Core)
1270		specific winestones, and must.
1271	V.A.1.c).(1)	use multiple evaluators (e.g., faculty members, peers,
1272	V.A.1.C).(1)	patients, self, and other professional staff members);
1273		and, (Core)
1274		anu, ·
1275	V.A.1.c).(2)	provide that information to the Clinical Competency
1277	V.A.1.0).(2)	Committee for its synthesis of progressive resident
1278		performance and improvement toward unsupervised
1279		practice. (Core)
1280		practice.
1281	V.A.1.d)	The program director or their designee, with input from the
1282	• ,	Clinical Competency Committee, must:
1283		
1284	V.A.1.d).(1)	meet with and review with each resident their
1285	, , ,	documented semi-annual evaluation of performance,
1286		including progress along the specialty-specific
1287		Milestones; (Core)
1288		•
1289	V.A.1.d).(2)	assist residents in developing individualized learning
1290	, , ,	plans to capitalize on their strengths and identify areas
1291		for growth; and, ^(Core)
1292		-
1293	V.A.1.d).(3)	develop plans for residents failing to progress,
1294		following institutional policies and procedures. (Core)
1295		

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a resident's performance at least at the end of each rotation. The program director or their designee will review those

evaluations, including their progress on the Milestones, at a minimum of every six months. Residents should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, residents should develop an individualized learning plan.

Residents who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the resident, will take a variety of forms based on the specific learning needs of the resident. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of resident progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

1000	program directo	r tollow institutional policies and procedures.
1296 1297	V.A.1.e)	At least annually, there must be a summative evaluation of

V.A.2.a).(2)	The final evaluation must:
V.A.2.a).(2).(a)	become part of the resident's permanent record maintained by the institution, and must be accessible for review by the resident in accordance with institutional policy; (Core)
V.A.2.a).(2).(b)	verify that the resident has demonstrated the knowledge, skills, and behaviors necessary to enter autonomous practice; (Core)
V.A.2.a).(2).(c)	consider recommendations from the Clinical Competency Committee; and, (Core)
V.A.2.a).(2).(d)	be shared with the resident upon completion of the program. (Core)
V.A.3.	A Clinical Competency Committee must be appointed by the program director. (Core)
V.A.3.a)	At a minimum, the Clinical Competency Committee must include three members of the program faculty, at least one of whom is a core faculty member. (Core)
V.A.3.a).(1)	Additional members must be faculty members from the same program or other programs, or other health professionals who have extensive contact and experience with the program's residents. (Core)
	distant. The second sec

Background and Intent: The requirements regarding the Clinical Competency Committee do not preclude or limit a program director's participation on the Clinical Competency Committee. The intent is to leave flexibility for each program to decide the best structure for its own circumstances, but a program should consider: its

program director's other roles as resident advocate, advisor, and confidante; the impact of the program director's presence on the other Clinical Competency Committee members' discussions and decisions; the size of the program faculty; and other program-relevant factors. The program director has final responsibility for resident evaluation and promotion decisions.

Program faculty may include more than the physician faculty members, such as other physicians and non-physicians who teach and evaluate the program's residents. There may be additional members of the Clinical Competency Committee. Chief residents who have completed core residency programs in their specialty may be members of the Clinical Competency Committee.

V.A.3.b)	The Clinical Competency Committee must:
V.A.3.b).(1)	review all resident evaluations at least semi-annually;
V.A.3.b).(2)	determine each resident's progress on achievement of the specialty-specific Milestones; and, (Core)
V.A.3.b).(3)	meet prior to the residents' semi-annual evaluations and advise the program director regarding each resident's progress. (Core)
V.B.	Faculty Evaluation
V.B.1.	The program must have a process to evaluate each faculty member's performance as it relates to the educational program at least annually. (Core)

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term "faculty" may be applied to physicians within a given institution for other reasons, it is applied to residency program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the resident and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with residents desire feedback on their education, clinical care, and research. If a faculty member does not interact with residents, feedback is not required. With regard to the diverse operating environments and configurations, the residency program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the residents in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

V.B.1.a)	This evaluation must include a review of the faculty member's clinical teaching abilities, engagement with the educational program, participation in faculty development related to their skills as an educator, clinical performance, professionalism, and scholarly activities. (Core)
	•
V.B.1.b)	This evaluation must include written, anonymous, and confidential evaluations by the residents. (Core)
V.B.2.	Faculty members must receive feedback on their evaluations at least annually. (Core)
\/ D 2	Deculte of the faculty advectional avaluations about the
V.B.3.	Results of the faculty educational evaluations should be incorporated into program-wide faculty development plans. (Core)
	V.B.1.b) V.B.2. V.B.3.

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the residents' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

1400		
1467	V.C.	Program Evaluation and Improvement
1468		
1469	V.C.1.	The program director must appoint the Program Evaluation
1470		Committee to conduct and document the Annual Program
1471		Evaluation as part of the program's continuous improvement
1472		process. (Core)
1473		
1474	V.C.1.a)	The Program Evaluation Committee must be composed of at
1475		least two program faculty members, at least one of whom is a
1476		core faculty member, and at least one resident. (Core)
1477		
1478	V.C.1.b)	Program Evaluation Committee responsibilities must include:
1479		
1480	V.C.1.b).(1)	acting as an advisor to the program director, through
1481		program oversight; ^(Core)
1482		
1483	V.C.1.b).(2)	review of the program's self-determined goals and
1484		progress toward meeting them; (Core)
1485		
1486	V.C.1.b).(3)	guiding ongoing program improvement, including
1487		development of new goals, based upon outcomes;
1488		and, ^(Core)
1489		
1490	V.C.1.b).(4)	review of the current operating environment to identify
1491		strengths, challenges, opportunities, and threats as
1492		related to the program's mission and aims. (Core)
1493		

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual

1466

Program Evaluation. Performance of residents and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.

1494

1494		
1495	V.C.1.c)	The Program Evaluation Committee should consider the
1496	,	following elements in its assessment of the program:

1541	V.C.1.c).(7).(b)	professional development. (Core)
1542		
1543	V.C.1.d)	The Program Evaluation Committee must evaluate the
1544		program's mission and aims, strengths, areas for
1545		improvement, and threats. (Core)
1546		
1547	V.C.1.e)	The annual review, including the action plan, must:
1548		
1549	V.C.1.e).(1)	be distributed to and discussed with the members of
1550		the teaching faculty and the residents; and, (Core)
1551		
1552	V.C.1.e).(2)	be submitted to the DIO. (Core)
1553		
1554	V.C.2.	The program must complete a Self-Study prior to its 10-Year
1555		Accreditation Site Visit. (Core)
1556		
1557	V.C.2.a)	A summary of the Self-Study must be submitted to the DIO.
1558		(Core)
1559		

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the residency program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the ACGME Manual of Policies and Procedures. Additionally, a description of the Self-Study process, as well as information on how to prepare for the 10-Year Accreditation Site Visit, is available on the ACGME website.

1560		
1561	V.C.3.	One goal of ACGME-accredited education is to educate physicians
1562		who seek and achieve board certification. One measure of the
1563		effectiveness of the educational program is the ultimate pass rate.
1564		
1565		The program director should encourage all eligible program
1566		graduates to take the certifying examination offered by the
1567		applicable American Board of Medical Specialties (ABMS) member
1568		board or American Osteopathic Association (AOA) certifying board.
1569		
1570	V.C.3.a)	For specialties in which the ABMS member board and/or AOA
1571		certifying board offer(s) an annual written exam, in the
1572		preceding three years, the program's aggregate pass rate of
1573		those taking the examination for the first time must be higher
1574		than the bottom fifth percentile of programs in that specialty.
1575		(Outcome)
1576		
1577	V.C.3.b)	For specialties in which the ABMS member board and/or AOA
1578		certifying board offer(s) a biennial written exam, in the
1579		preceding six years, the program's aggregate pass rate of
1580		those taking the examination for the first time must be higher

1581 1582		than the bottom fifth percentile of programs in that specialty.
1583		
1584	V.C.3.c)	For specialties in which the ABMS member board and/or AOA
1585	·	certifying board offer(s) an annual oral exam, in the preceding
1586		three years, the program's aggregate pass rate of those
1587		taking the examination for the first time must be higher than
1588		the bottom fifth percentile of programs in that specialty.
1589		(Outcome)
1590		
1591	V.C.3.d)	For specialties in which the ABMS member board and/or AOA
1592		certifying board offer(s) a biennial oral exam, in the preceding
1593		six years, the program's aggregate pass rate of those taking
1594		the examination for the first time must be higher than the
1595		bottom fifth percentile of programs in that specialty. (Outcome)
1596		
1597	V.C.3.e)	For each of the exams referenced in V.C.3.a)-d), any program
1598		whose graduates over the time period specified in the
1599		requirement have achieved an 80 percent pass rate will have
1600		met this requirement, no matter the percentile rank of the
1601		program for pass rate in that specialty. (Outcome)
1602		

4 - 0 4

1603 1604

1605 1606

1607

Background and Intent: Setting a single standard for pass rate that works across specialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are specialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

V.C.3.f) Programs must report, in ADS, board certification status annually for the cohort of board-eligible residents that graduated seven years earlier. (Core)

Background and Intent: It is essential that residency programs demonstrate knowledge and skill transfer to their residents. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from residency graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

1608 1609 VI. The Learning and Working Environment 1610 1611 Residency education must occur in the officers.

1612 1613 1614

1615

1616

1617 1618

1619 1620

1621 1622

1623

1624 1625

1626 1627

1628

1629

1630 1631

1632 1633 Residency education must occur in the context of a learning and working environment that emphasizes the following principles:

- Excellence in the safety and quality of care rendered to patients by residents today
- Excellence in the safety and quality of care rendered to patients by today's residents in their future practice
- Excellence in professionalism through faculty modeling of:
 - the effacement of self-interest in a humanistic environment that supports the professional development of physicians
 - o the joy of curiosity, problem-solving, intellectual rigor, and discovery
- Commitment to the well-being of the students, residents, faculty members, and all members of the health care team

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and residents more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and residents to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, resident education, and resident well-being. The requirements are intended to support the development of a sense of professionalism by encouraging residents to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for residents to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and resident and faculty member well-being. The requirements are intended to support programs and residents as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and residents. With this flexibility comes a responsibility for residents and faculty members to recognize the need to hand off care of a patient to another provider when a resident is too fatigued to provide safe, high quality care and for programs to ensure that residents remain within the 80-hour maximum weekly limit.

- VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability
- VI.A.1. Patient Safety and Quality Improvement

	All physicians share responsibility for promoting patient safety and
	enhancing quality of patient care. Graduate medical education must
	prepare residents to provide the highest level of clinical care with
	continuous focus on the safety, individual needs, and humanity of
	their patients. It is the right of each patient to be cared for by
	residents who are appropriately supervised; possess the requisite
	knowledge, skills, and abilities; understand the limits of their
	knowledge and experience; and seek assistance as required to
	provide optimal patient care.
	-
	Residents must demonstrate the ability to analyze the care they
	provide, understand their roles within health care teams, and play an
	active role in system improvement processes. Graduating residents
	will apply these skills to critique their future unsupervised practice
	and effect quality improvement measures.
	It is necessary for vasidants and faculty manhays to consistently
	It is necessary for residents and faculty members to consistently
	work in a well-coordinated manner with other health care
	professionals to achieve organizational patient safety goals.

1709	VI.A.Z.	Supervision and Accountability
1770	VI A 2 a)	Although the attending physician is ultimately responsible for
1771	VI.A.2.a)	Although the attending physician is ultimately responsible for the care of the patient, every physician shares in the
1772		responsibility and accountability for their efforts in the
1773		provision of care. Effective programs, in partnership with
1774		their Sponsoring Institutions, define, widely communicate,
1775		and monitor a structured chain of responsibility and
1776		accountability as it relates to the supervision of all patient
1777		care.
1779		Cai G.
1779		Supervision in the setting of graduate medical education
1780		provides safe and effective care to patients; ensures each
1781		resident's development of the skills, knowledge, and attitudes
1783		required to enter the unsupervised practice of medicine; and
1784		establishes a foundation for continued professional growth.
1707		cottabilities a roundation for continued professional growth.

1785		
1786 1787 1788	VI.A.2.a).(1)	Each patient must have an identifiable and appropriately-credentialed and privileged attending
1789		physician (or licensed independent practitioner as
1799		specified by the applicable Review Committee) who is responsible and accountable for the patient's care.
1790		(Core)
1791		
1792	VI.A.2.a).(1).(a)	This information must be available to residents,
1793	VI.A.2.a).(1).(a)	faculty members, other members of the health
1795		care team, and patients. (Core)
1795		care team, and patients.
1797	VI.A.2.a).(1).(b)	Residents and faculty members must inform
1798	V1.Α.Σ.α).(1).(b)	each patient of their respective roles in that
1799		patient's care when providing direct patient
1800		care. (Core)
1801		out or
1802	VI.A.2.b)	Supervision may be exercised through a variety of methods.
1803	· <u>-</u> ,	For many aspects of patient care, the supervising physician
1804		may be a more advanced resident or fellow. Other portions of
1805		care provided by the resident can be adequately supervised
1806		by the appropriate availability of the supervising faculty
1807		member, fellow, or senior resident physician, either on site or
1808		by means of telecommunication technology. Some activities
1809		require the physical presence of the supervising faculty
1810		member. In some circumstances, supervision may include
1811		post-hoc review of resident-delivered care with feedback.
1812		•

4705

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of resident patient interactions, education and training locations, and resident skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a resident gains more experience, even with the same patient condition or procedure. All residents have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

1813		
1814	VI.A.2.b).(1)	The program must demonstrate that the appropriate
1815		level of supervision in place for all residents is based
1816		on each resident's level of training and ability, as well
1817		as patient complexity and acuity. Supervision may be
1818		exercised through a variety of methods, as appropriate
1819		to the situation. ^(Core)
1820		
1821	VI.A.2.b).(2)	The program must define when physical presence of a
1822		supervising physician is required. ^(Core)
1823		
1824	VI.A.2.c)	Levels of Supervision
1825		

1826 1827 1828 1829		To promote appropriate resident supervision while providing for graded authority and responsibility, the program must use the following classification of supervision: (Core)
1830 1831	VI.A.2.c).(1)	Direct Supervision:
1832 1833 1834 1835	VI.A.2.c).(1).(a)	the supervising physician is physically present with the resident during the key portions of the patient interaction; or, (Core)
1836 1837 1838 1839	VI.A.2.c).(1).(a).(i)	PGY-1 residents must initially be supervised directly, only as described in VI.A.2.c).(1).(a). (Core)
1840 1841 1842 1843 1844	VI.A.2.c).(1).(a).(i).(a)	PGY-1 residents should progress to being supervised indirectly with direct supervision available only after demonstrating competence in:
1845 1846 1847 1848	VI.A.2.c).(1).(a).(i).(a).(i)	the ability and willingness to ask for help when indicated; (Detail)
1849 1850 1851	VI.A.2.c).(1).(a).(i).(a).(ii)	gathering an appropriate history; ^(Detail)
1852 1853 1854 1855	VI.A.2.c).(1).(a).(i).(a).(iii)	the ability to perform an emergent psychiatric assessment; and, ^(Detail)
1856 1857 1858 1859 1860	VI.A.2.c).(1).(a).(i).(a).(iv)	presenting patient findings and data accurately to a supervisor who has not seen the patient. (Detail)
1861 1862 1863 1864 1865 1866	VI.A.2.c).(1).(b)	the supervising physician and/or patient is not physically present with the resident and the supervising physician is concurrently monitoring the patient care through appropriate telecommunication technology. (Core)
1867 1868 1869 1870 1871	VI.A.2.c).(1).(b).(i)	When a resident requiring direct supervision provides remote care, the supervising physician must be physically present with the resident. (Core)
1872 1873 1874 1875 1876	VI.A.2.c).(2)	Indirect Supervision: the supervising physician is not providing physical or concurrent visual or audio supervision but is immediately available to the resident for guidance and is available to provide appropriate direct supervision. (Core)

VI.A.2.c).(3)	Oversight – the supervising physician is available to
, , ,	provide review of procedures/encounters with
	feedback provided after care is delivered. (Core)
VI.A.2.d)	The privilege of progressive authority and responsibility,
	conditional independence, and a supervisory role in patient
	care delegated to each resident must be assigned by the
	program director and faculty members. (Core)
VI.A.2.d).(1)	The program director must evaluate each resident's
, , ,	abilities based on specific criteria, guided by the
	Milestones. (Core)
VI.A.2.d).(2)	Faculty members functioning as supervising
- / (/	physicians must delegate portions of care to residents
	based on the needs of the patient and the skills of
	each resident. (Core)
VI.A.2.d).(3)	Senior residents or fellows should serve in a
	supervisory role to junior residents in recognition of
	their progress toward independence, based on the needs of each patient and the skills of the individual
	resident or fellow. (Detail)
VI.A.2.e)	Programs must set guidelines for circumstances and events in which residents must communicate with the supervising
	faculty member(s). (Core)
VI.A.2.e).(1)	Each resident must know the limits of their scope of authority, and the circumstances under which the
	resident is permitted to act with conditional
	independence. (Outcome)
Backgroup	d and Intent: The ACGME Glossary of Terms defines conditional
	ice as: Graded, progressive responsibility for patient care with defined
oversight.	
VI.A.2.f)	Faculty supervision assignments must be of sufficient
·,	duration to assess the knowledge and skills of each resident
	and to delegate to the resident the appropriate level of patient
	care authority and responsibility. (Core)
VI.B.	Professionalism
\	
VI.B.1.	Programs, in partnership with their Sponsoring Institutions, must educate residents and faculty members concerning the professional
	responsibilities of physicians, including their obligation to be
	appropriately rested and fit to provide the care required by their
	patients. ^(Core)

1925	VI.B.2.	The learning objectives of the program must:
1926		
1927	VI.B.2.a)	be accomplished through an appropriate blend of supervised
1928	•	patient care responsibilities, clinical teaching, and didactic
1929		educational events; (Core)
1930		,
1931	VI.B.2.b)	be accomplished without excessive reliance on residents to
1932	- 7	fulfill non-physician obligations; and, (Core)
1933		, , , , , , , , , , , , , , , , , , ,

Background and Intent: Routine reliance on residents to fulfill non-physician obligations increases work compression for residents and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that residents may be expected to do any of these things on occasion when the need arises, these activities should not be performed by residents routinely and must be kept to a minimum to optimize resident education.

1934

VI.B.2.c) ensure manageable patient care responsibilities. (Core)

1935 1936

> Background and Intent: The Common Program Requirements do not define "manageable patient care responsibilities" as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression, especially at the PGY-1 level.

1937 1938

VI.B.3. The program director, in partnership with the Sponsoring Institution, 1939 must provide a culture of professionalism that supports patient safety and personal responsibility. (Core) 1940 1941 VI.B.4. 1942 Residents and faculty members must demonstrate an understanding 1943 of their personal role in the: provision of patient- and family-centered care; (Outcome) VI.B.4.a)

1944

1945 1946

1947 1948

1983	VI.D./.	Programs, in partnership with their Sponsoring Institutions, should have a process for education of residents and faculty regarding
1984		unprofessional behavior and a confidential process for reporting,
1985		investigating, and addressing such concerns. (Core)
1986		
1987	VI.C.	Well-Being
1988		
1989		Psychological, emotional, and physical well-being are critical in the
1990 1991		development of the competent, caring, and resilient physician and require proactive attention to life inside and outside of medicine. Well-being
1991		requires that physicians retain the joy in medicine while managing their
1993		own real-life stresses. Self-care and responsibility to support other
1994		members of the health care team are important components of
1995		professionalism; they are also skills that must be modeled, learned, and
1996		nurtured in the context of other aspects of residency training.
1997		

Residents and faculty members are at risk for burnout and depression. Programs, in partnership with their Sponsoring Institutions, have the same responsibility to address well-being as other aspects of resident competence. Physicians and all members of the health care team share responsibility for the well-being of each other. For example, a culture which encourages covering for colleagues after an illness without the expectation of reciprocity reflects the ideal of professionalism. A positive culture in a clinical learning environment models constructive behaviors, and prepares residents with the skills and attitudes needed to thrive throughout their careers.

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website: www.acgme.org/physicianwellbeing.

The ACGME also created a repository for well-being materials, assessments, presentations, and more on the Well-Being Tools and Resources page in Learn at ACGME for programs seeking to develop or strengthen their own well-being initiatives. There are many activities that programs can implement now to assess and support physician well-being. These include the distribution and analysis of culture of safety surveys, ensuring the availability of counseling services, and paying attention to the safety of the entire health care team.

VI.C.1.a)

VI.C.1.b)

2000

VI.C.1. The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:

efforts to enhance the meaning that each resident finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; (Core)

attention to scheduling, work intensity, and work compression that impacts resident well-being; (Core)

VI.C.1.c) evaluating workplace safety data and addressing the safety of residents and faculty members; (Core)

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance resident and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

 policies and programs that encourage optimal resident and faculty member well-being; and, (Core)

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

Residents must be given the opportunity to attend medical, mental health, and dental care appointments, including those scheduled during their working hours.

Background and Intent: The intent of this requirement is to ensure that residents have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Residents must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

VI.C.1.e)

VI.C.1.d)

VI.C.1.d).(1)

attention to resident and faculty member burnout, depression, and substance use disorders. The program, in partnership with its Sponsoring Institution, must educate faculty members and residents in identification of the symptoms of burnout, depression, and substance use disorders, including means to assist those who experience these conditions. Residents and faculty members must also be educated to recognize those symptoms in themselves and how to seek appropriate care. The program, in partnership with its Sponsoring Institution, must: (Core)

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials to create systems for identification of burnout, depression, and substance use disorders. Materials and more information are available in Learn at ACGME (https://dl.acgme.org/pages/well-being-tools-resources).

VI.C.1.e).(1)

encourage residents and faculty members to alert the program director or other designated personnel or programs when they are concerned that another resident, fellow, or faculty member may be displaying signs of burnout, depression, a substance use disorder, suicidal ideation, or potential for violence; (Core)

Background and Intent: Individuals experiencing burnout, depression, a substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that residents and faculty members are able to report their concerns when another resident or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the

department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Residents and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

VI.C.1.e).(2) provide access to appropriate tools for self-screening; and, (Core)

VI.C.1.e).(3) provide access to confidential, affordable mental health assessment, counseling, and treatment, including access to urgent and emergent care 24

hours a day, seven days a week. (Core)

Background and Intent: The intent of this requirement is to ensure that residents have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

2066 2067 2068

2069

2070

VI.C.2. There are circumstances in which residents may be unable to attend work, including but not limited to fatigue, illness, family emergencies, and parental leave. Each program must allow an appropriate length of absence for residents unable to perform their patient care responsibilities. (Core)

207120722073

VI.C.2.a)

VI.C.2.b)

VI.D.1.

The program must have policies and procedures in place to ensure coverage of patient care. (Core)

207520762077

2074

These policies must be implemented without fear of negative consequences for the resident who is or was unable to provide the clinical work. (Core)

2078 2079

Background and Intent: Residents may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

2080 2081

VI.D. Fatigue Mitigation

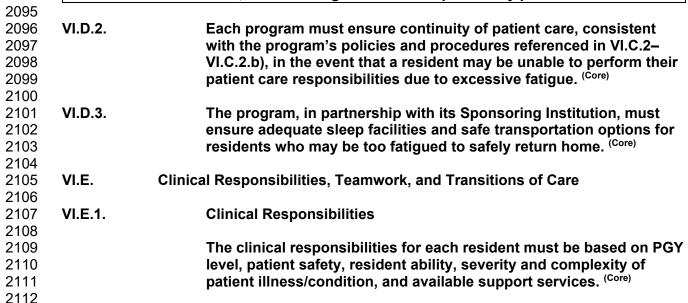

2082 2083 2084

Programs must:

VI.D.1.a)	educate all faculty members and residents to recognize the signs of fatigue and sleep deprivation; ^(Core)
VI.D.1.b)	educate all faculty members and residents in alertness
•	management and fatigue mitigation processes; and, (Core)
VI.D.1.c)	encourage residents to use fatigue mitigation processes to
•	manage the potential negative effects of fatigue on patient
	care and learning. (Detail)
	•
	,

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares residents for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on residents. Faculty members and program directors need to make sure residents function in an environment that has safe patient care and a sense of resident well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor resident workload. Workload

should be distributed among the resident team and interdisciplinary teams to minimize work compression.

VI.E.2.	Teamwork
	Residents must care for patients in an environment that maxim communication. This must include the opportunity to work as a member of effective interprofessional teams that are appropria the delivery of care in the specialty and larger health system. (C)
VI.E.2.a)	Contributors to effective interprofessional teams should incluce consulting physicians, psychologists, psychiatric nurses, so workers, and other professional and paraprofessional menta health personnel involved in the evaluation and treatment of patients. (Detail)
VI.E.3.	Transitions of Care
VI.E.3.a)	Programs must design clinical assignments to optimize transitions in patient care, including their safety, frequenand structure. (Core)
VI.E.3.b)	Programs, in partnership with their Sponsoring Institution must ensure and monitor effective, structured hand-ove processes to facilitate both continuity of care and patien safety. (Core)
VI.E.3.c)	Programs must ensure that residents are competent in communicating with team members in the hand-over pro
VI.E.3.d)	Programs and clinical sites must maintain and communischedules of attending physicians and residents current responsible for care. (Core)
VI.E.3.e)	Each program must ensure continuity of patient care, consistent with the program's policies and procedures referenced in VI.C.2-VI.C.2.b), in the event that a resident be unable to perform their patient care responsibilities decreases are excessive fatigue or illness, or family emergency. (Core)
VI.F.	Clinical Experience and Education
	Programs, in partnership with their Sponsoring Institutions, must design an effective program structure that is configured to provide residents educational and clinical experience opportunities, as well as reasonal opportunities for rest and personal activities.

Background and Intent: In the new requirements, the terms "clinical experience and education," "clinical and educational work," and "clinical and educational work hours"

replace the terms "duty hours," "duty periods," and "duty." These changes have been made in response to concerns that the previous use of the term "duty" in reference to number of hours worked may have led some to conclude that residents' duty to "clock out" on time superseded their duty to their patients.

2165 2166 VI.F.1. Maximum Hours of Clinical and Educational Work per Week

Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting. (Core)

Background and Intent: Programs and residents have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing residents to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a resident may work in excess of 80 hours in a given week, all programs and residents utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a fourweek period. Programs that regularly schedule residents to work 80 hours per week and still permit residents to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that residents are scheduled to work fewer than 80 hours per week, which would allow residents to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for residents to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that residents are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work residents choose to do from home. The requirement provides flexibility for residents to do this while ensuring that the time spent by residents completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an

electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Resident decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the resident's supervisor. In such circumstances, residents should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a resident spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the resident need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by residents. The new requirements are not an attempt to micromanage this process. Residents are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual resident. Programs will need to factor in time residents are spending on clinical work at home when schedules are developed to ensure that residents are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that residents report their time from home and that schedules are structured to ensure that residents are not working in excess of 80 hours per week, averaged over four weeks.

PGY-1 and PGY-2 Residents

PGY-1 and PGY-2 residents may not have the experience to make decisions about when it is appropriate to utilize flexibility or may feel pressured to use it when unnecessary. Programs are responsible for ensuring that residents are provided with manageable workloads that can be accomplished during scheduled work hours. This includes ensuring that a resident's assigned direct patient load is manageable, that residents have appropriate support from their clinical teams, and that residents are not overburdened with clerical work and/or other non-physician duties.

2167		
2168	VI.F.2.	Mandatory Time Free of Clinical Work and Education
2169		
2170	VI.F.2.a)	The program must design an effective program structure that
2171		is configured to provide residents with educational
2172		opportunities, as well as reasonable opportunities for rest
2173		and personal well-being. (Core)
2174		
2175	VI.F.2.b)	Residents should have eight hours off between scheduled
2176		clinical work and education periods. (Detail)
2177		
2178	VI.F.2.b).(1)	There may be circumstances when residents choose
2179		to stay to care for their patients or return to the
2180		hospital with fewer than eight hours free of clinical
2181		experience and education. This must occur within the
2182		context of the 80-hour and the one-day-off-in-seven
2183		requirements. (Detail)
2184		

Background and Intent: While it is expected that resident schedules will be structured to ensure that residents are provided with a minimum of eight hours off between scheduled work periods, it is recognized that residents may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for residents to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

2185 2186

VI.F.2.c) Residents must have at least 14 hours free of clinical work and education after 24 hours of in-house call. (Core)

2187 2188

Background and Intent: Residents have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, residents are encouraged to prioritize sleep over other discretionary activities.

2189 2190

VI.F.2.d)

Residents must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. (Core)

2191 2192 2193

2194

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and resident needs. It is strongly recommended that residents' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some residents may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide residents with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes resident well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

2195 2196

2197

VI.F.3. Maximum Clinical Work and Education Period Length

VI.F.3.a) Clinical and educational work periods for residents must not exceed 24 hours of continuous scheduled clinical assignments. (Core)

2198219922002201

Background and Intent: The Task Force examined the question of "consecutive time on task." It examined the research supporting the current limit of 16 consecutive hours of time on task for PGY-1 residents; the range of often conflicting impacts of this requirement on patient safety, clinical care, and continuity of care by resident teams; and resident learning found in the literature. Finally, it heard a uniform request by the specialty societies, certifying boards, membership societies and organizations, and senior residents to repeal this requirement. It heard conflicting perspectives from

resident unions, a medical student association, and a number of public advocacy groups, some arguing for continuation of the requirement, others arguing for extension of the requirement to all residents.

Of greatest concern to the Task Force were the observations of disruption of team care and patient care continuity brought about with residents beyond the PGY-1 level adhering to differing requirements. The graduate medical education community uniformly requested that the Task Force remove this requirement. The most frequentlycited reason for this request was the complete disruption of the team, separating the PGY-1 from supervisory faculty members and residents who were best able to judge the ability of the resident and customize the supervision of patient care for each PGY-1. Cited nearly as frequently was the separation of the PGY-1 from the team, delaying maturation of clinical skills, and threatening to create a "shift" mentality in disciplines where overnight availability to patients is essential in delivery of care.

The Task Force examined the impact of the request to consider 16-consecutive-hour limits for all residents, and rejected the proposition. It found that model incompatible with the actual practice of medicine and surgery in many specialties, excessively limiting in configuration of clinical services in many disciplines, and potentially disruptive of the inculcation of responsibility and professional commitment to altruism and placing the needs of patients above those of the physician.

After careful consideration of the information available, the testimony and position of all parties submitting information, and presentations to the Task Force, the Task Force removed the 16-hour-consecutive-time-on-task requirement for PGY-1 residents. It remains crucial that programs ensure that PGY-1 residents are supervised in compliance with the applicable Program Requirements, and that resident well-being is prioritized as described in Section VI.C. of these requirements.

2202 2203

VI.F.3.a).(1)

2204 2205

2206 2207

2208 2209

2210

VI.F.3.a).(1).(a)

Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or resident education.

> Additional patient care responsibilities must not be assigned to a resident during this time. (Core)

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the resident continue to function as a member of the team in an environment where other members of the team can assess resident fatigue, and that supervision for post-call residents is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

2211 2212

VI.F.4. **Clinical and Educational Work Hour Exceptions**

2213

2214 VI.F.4.a)

2216

2217

In rare circumstances, after handing off all other responsibilities, a resident, on their own initiative, may elect 2215 to remain or return to the clinical site in the following circumstances:

2218		
2219	VI.F.4.a).(1)	to continue to provide care to a single severely ill or
2220	, , ,	unstable patient; (Detail)
2221		•
2222	VI.F.4.a).(2)	humanistic attention to the needs of a patient or
2223	, , ,	family; or, ^(Detail)
2224		
2225	VI.F.4.a).(3)	to attend unique educational events. (Detail)
2226	, , ,	·
2227	VI.F.4.b)	These additional hours of care or education will be counted
2228	•	toward the 80-hour weekly limit. (Detail)
2229		- -

Background and Intent: This requirement is intended to provide residents with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a resident may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Residents must not be required to stay. Programs allowing residents to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the resident and that residents are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

2231 2232	VI.F.4.c)	A Review Committee may grant rotation-specific exceptions for up to 10 percent or a maximum of 88 clinical and
2233		educational work hours to individual programs based on a
2234		sound educational rationale.
2235		
2236		The Review Committee for Psychiatry will not consider requests
2237		for exceptions to the 80-hour limit to the residents' work week.
2238	\n = =	
2239	VI.F.5.	Moonlighting
2240		
2241	VI.F.5.a)	Moonlighting must not interfere with the ability of the resident
2242		to achieve the goals and objectives of the educational
2243		program, and must not interfere with the resident's fitness for
2244		work nor compromise patient safety. (Core)
2245	=	
2246	VI.F.5.b)	Time spent by residents in internal and external moonlighting
2247		(as defined in the ACGME Glossary of Terms) must be
2248		counted toward the 80-hour maximum weekly limit. (Core)
2249		
2250	VI.F.5.c)	PGY-1 residents are not permitted to moonlight. (Core)
2251		

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements).

2253 VI.F.6. In-House Night Float 2254

2230

2252

	Night float must occur within the context of the 80-hour and one-day-off-in-seven requirements. (Core)
VI.F.6.a)	Residents should not be scheduled for more than four consecutive weeks of night float during the required one-year, full-time outpatient psychiatry experience. (Detail)
VI.F.6.b)	Residents should not be scheduled for more than a total of eight weeks of night float during the one-year of consecutive outpatient experience. (Detail)
	nd Intent: The requirement for no more than six consecutive nights of removed to provide programs with increased flexibility in scheduling.
VI.F.7.	Maximum In-House On-Call Frequency
	Residents must be scheduled for in-house call no more frequently than every third night (when averaged over a four-week period). (Core)
VI.F.7.a)	On psychiatry rotations, in-house call must occur no more frequently than every fourth night, averaged over a four-week period. (Core)
VI.F.8.	At-Home Call
VI.F.8.a)	Time spent on patient care activities by residents on at-home call must count toward the 80-hour maximum weekly limit. The frequency of at-home call is not subject to the everythird-night limitation, but must satisfy the requirement for one day in seven free of clinical work and education, when averaged over four weeks. (Core)
VI.F.8.a).(1)	At-home call must not be so frequent or taxing as to preclude rest or reasonable personal time for each resident. (Core)
VI.F.8.b)	Residents are permitted to return to the hospital while on athome call to provide direct care for new or established patients. These hours of inpatient patient care must be included in the 80-hour maximum weekly limit. (Detail)

Background and Intent: This requirement has been modified to specify that clinical work done from home when a resident is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time residents devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in residents routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

2293

In their evaluation of residency/fellowship programs, Review Committees will look at the overall impact of at-home call on resident/fellow rest and personal time.
